

Bahram, the influential sorcerer in the service of the Sultan of Iranistan, has lost control of his powers. He has become a shape-shifter against his own will and no one knows whether this is a punishment from the gods or a curse picked up from his excessive studies of impious mysteries. As the evil continues to worsen, and in fear of losing his human envelope once and for all, the sorcerer has started a complex and dangerous ritual in order to lift this curse. The Sultan, on the other hand, does not wish to run any risks and has sent Prince Kerim Shah to solve the problem at his discretion; Bahram has become a danger to the ruling family and the people around him.

Kerim Shah is unwilling to send his best warriors to certain death so he buys the services of a band of killers in the streets of the cosmopolitan and colorful Zambula, in Turanian territory. Killers that, provided they are highly paid, have little regard for the dangers that may be incurred; a renegade from the Black Kingdoms - a taciturn barbarian from the north, and a Shemite warrior whose beauty is as dark as her blade is deadly.

Their orders are simple, find Bahram and eliminate him. However, in the face of the sorcerer's power, the Sultan will be satisfied if the group succeeds, at the very least, in preventing his ritual thus leaving him to end his days in the form of an animal.

Winning the Game:

If the heroes kill the sorcerer, or prevent the Overlord from warding off the curse before the end of turn 7; the heroes win the game.

If the Overlord wards off the curse before the end of turn 7; the Overlord wins the game.

Suggestions for 4 heroes:

- Conan the wanderer (Axe)
- Savage Bêlit (Dagger and Parrying Dagger)
- Kerim Shah (Sword)
- Amboola (Dagger)

After setup, each hero moves 5 gems from their Reserve zone to their Fatigue zone.

The game starts with the Overlord's turn. The Overlord starts with 11 gems in their Reserve zone and 0 in their Fatigue zone, and places the recovery token showing a recovery value of "7" in the Book of Skelos.

Reinforcement: 5 reinforcement points

During setup the Overlord places the tokens numbered 1 to 3 faceup on the board as indicated by the set up diagram to represent the altars.

The Sorcerer has Return of the Braves and Mitra's Halo.

6

Special Rules (part 1) :

* **Animal Form:** At the beginning of the scenario the tiles of the Giant Spider, the Giant Scorpion and the Camel are placed next to the Book of Skelos, unbloody side faceup, these tiles are considered as being the animal form tiles. The models of the Giant Spider, the Giant Scorpion and the Camel are placed next to the Book of Skelos, these models are considered as being the animal form models.

* **Pirate:** During setup the Overlord places the Pirate tile (orange, armor value 2 and movement value 2) next to the Book of Skelos. Pirates are considered neither as being heroes' allies nor Overlord units; they do not count for hindering for either side. Pirates can only be killed by a melee attack performed by the Overlord troops. They do not suffer damage from wounds inflicted by heroes.

* **Curse:** If at least one of the animal form tiles is placed unbloody side faceup at the beginning of each activation of the Sorcerer tile, the Overlord carries out the following steps:

1- The Overlord chooses one of the animal form tiles unbloody side faceup and turns it bloody side faceup.

2- The model representing the Sorcerer is then replaced by the animal form model corresponding to the animal form tile that has just been turned bloody side faceup. This model now represents the Sorcerer. The Sorcerer's turn will be played in the current animal form.

3- While the Sorcerer is represented by an animal form model, all the characteristics of the animal form tile (movement, armor, attack and skills) corresponding to the animal form model that represents the Sorcerer, replace all the characteristics of the Sorcerer tile (movement, armor, attack, spells and skills). If Mitra's Halo is activated when the Sorcerer is transformed, it is automatically deactivated.

Special Rules (part 2) :

If all the animal form tiles are placed bloody side faceup at the beginning of each activation of the Sorcerer tile, the Overlord carries out the following steps:

- 1- The Overlord turns all the animal form tiles unbloody side faceup.
 - 2- The model that represents the Sorcerer is replaced by the model of the Sorcerer. The Sorcerer's turn is then played in the form of the Sorcerer.
 - 3- While the Sorcerer is represented by the model of the Sorcerer, the characteristics of the Sorcerer tile (movement, armor, attack, spells and skills) are used for all that concerns the Sorcerer.
- * **Warding off the curse:** To ward off the curse the Overlord must sacrifice a pirate on each of the three altars. For this the pirate must be in the same area as a altars token  and the Overlord must kill them using a melee attack. When a pirate is sacrificed on an altar, the altar token is removed from the board as well as the animal tile and model corresponding to the altar token (1-Camel, 2-Giant Scorpion, 3-Giant Spider). If the animal form model that must be removed from the game corresponds to the current form of the Sorcerer, it is then replaced on the board by the model of the Sorcerer.
 - * **Escorting the Pirates:** If an Overlord unit starts its activation phase in the same area as a pirate, the Overlord can decide to move the pirate model at the same time as the activated unit. The pirate makes the same move (or part of the move) as the Overlord unit. If the Overlord uses a Movement benefit for the activated unit, the pirate can follow the unit without the Overlord moving an additional gem for the pirate's move. At any moment of the unit's move, the Overlord can decide that the pirate will no longer follow the unit in question and so stop the pirate. It must not be forgotten that pirates do not count for hindering. An Overlord model can only move one pirate with them and each pirate can only be moved once per tile activation.
 - * **Attacking the Sorcerer:** When the Sorcerer is represented by an animal form model the heroes cannot target it with an attack (Melee or Ranged).
 - * **Altar:** A hero in the same area as an altar can perform a simple Manipulation to activate the altar. If a hero activates the altar corresponding to the current form of the Sorcerer (1-Camel, 2-Giant Scorpion, 3-Giant Spider) then the animal form model is replaced by that of the Sorcerer.
 - * **Lines of Sight:** A character in a wall area has line of sight to each ground area within the fortress walls. An area in a tower and an area outside that tower are within each other's line of sight only if the areas are in or adjacent to the tower.
 - * **Leaping from Walls:** A character can move across a parapet from a wall area to a ground area as though it were a border. The character rolls   for falling damage. If the character has Leap, the character rolls  instead.
 - * **Rock Slide:** A character can move into a rock side area  from an adjacent area. The character must spend 2 extra movement points unless the character has Climbing.
 - * **Chests:** During setup, the Overlord places 4 chests on the board as indicated by the setup diagram. The asset deck contains: 1 Battle Axe, 1 Turanian Sword, 1 Tribal Mace, and 1 Zingarian Bow.
