

(RPC.0) The Promethean Confederacy

(RPC.1) Promethean Confederacy Background

The successful expansion of Andrium colonies into the Sorillian Belt brought with it as much controversy as it did prosperity. By Y118, the labor unions that monopolized mining operations in the colonial sectors and had allied themselves with the powerful trade factions of the Monarchy, resulting in a political power shift away from the throne. Not only had this factional alliance managed to gain control of all markets stemming from colonial space, they had fielded enough Navy vessels to defend it.

On Promethea, the Union of Members drafted and submitted the Proclamation of Independent Trade, which declared that all Union activity within the Belt was independent from the Throne and that all Naval activity within the belt would be discouraged. Cut off from its most resourceful systems, the Andrium found themselves in a precarious situation: bend to the wishes of the Confederacy or risk Civil War.

While the King Onahcrah II summoned his advisors and the Unions held their meetings, tensions ran high in the crews of the warships patrolling the vast borders. Complicating matters further, a number of trade unions organized by the influential Thaan Industries began to openly challenge Navy forces, a position that would soon gain support amongst the restless Unions.

The Royal Family was in chaos over the impending loss of colonial space, with at least half of the lineage due to lose significant fortunes, the King included. Despite the financial loss, the Monarchy appeared on the verge of accepting the Union's terms when their hand was forced in the other direction by a sneak attack on Royal holdings by Thaan forces that resulted in the deaths of 2 Dukes and the King's nephew.

Details of the events that followed are murky. Official Andrium records indicate that the initial Navy counter-attack dealt significant damage to the forces responsible for the deaths of the Royals, which may have precipitated the Thaan withdrawal from the confederacy. The union forces deny ever supporting the actions of the Thaan, although the testimony of Naval captains conflicts with these claims. The role of the Thaan in sparking incidents during this period remains a mystery, but the events proceeding are well known.

The Andrium Civil War was bloody, but thanks to the timely intervention of the PAX Cooperative, it was short by galactic standards. What the Confederacy lacked in overall numbers, they made up for with technology that the Navy Ships had

no adequate defense for - drones. Additionally, the Union forces benefited from having better tactical knowledge of the Sorielian Belt, utilizing charts that the Andrium simply didn't have access to. Military historians are split on who may have emerged the victor had the war not ended when it did.

Late in Y121, exactly 2 years to the day after it began, the Andrium Civil War ended in one brief stroke in the Andrium capital of Verund. Under the advisement of PAX mediators, the Proclamation of Independent Trade was accepted by the Monarch in exchange for a beneficial trade treaty with the former colonies and a commitment to uniting against the growing Za'Cahri threat.

(RPC.0) The Promethean Confederacy

(RPC.1) Promethean Confederacy Background

The successful expansion of Andrium colonies into the Sorillian Belt brought with it as much controversy as it did prosperity. By Y118, the labor unions that monopolized mining operations in the colonial sectors and had allied themselves with the powerful trade factions of the Monarchy, resulting in a political power shift away from the throne. Not only had this factional alliance managed to gain control of all markets stemming from colonial space, they had fielded enough Navy vessels to defend it.

On Promethea, the Union of Members drafted and submitted the Proclamation of Independent Trade, which declared that all Union activity within the Belt was independent from the Throne and that all Naval activity within the belt would be discouraged. Cut off from its most resourceful systems, the Andrium found themselves in a precarious situation: bend to the wishes of the Confederacy or risk Civil War.

While the King Onahcrah II summoned his advisors and the Unions held their meetings, tensions ran high in the crews of the warships patrolling the vast borders. Complicating matters further, a number of trade unions organized by the influential Thaan Industries began to openly challenge Navy forces, a position that would soon gain support amongst the restless Unions.

The Royal Family was in chaos over the impending loss of colonial space, with at least half of the lineage due to lose significant fortunes, the King included. Despite the financial loss, the Monarchy appeared on the verge of accepting the

Union's terms when their hand was forced in the other direction by a sneak attack on Royal holdings by Thaan forces that resulted in the deaths of 2 Dukes and the King's nephew.

Details of the events that followed are murky. Official Andrium records indicate that the initial Navy counter-attack dealt significant damage to the forces responsible for the deaths of the Royals, which may have precipitated the Thaan withdrawal from the confederacy. The union forces deny ever supporting the actions of the Thaan, although the testimony of Naval captains conflicts with these claims. The role of the Thaan in sparking incidents during this period remains a mystery, but the events proceeding are well known.

The Andrium Civil War was bloody, but thanks to the timely intervention of the PAX Cooperative, it was short by galactic standards. What the Confederacy lacked in overall numbers, they made up for with technology that the Navy Ships had no adequate defense for - drones. Additionally, the Union forces benefited from having better tactical knowledge of the Sorielian Belt, utilizing charts that the Andrium simply didn't have access to. Military historians are split on who may have emerged the victor had the war not ended when it did.

Late in Y121, exactly 2 years to the day after it began, the Andrium Civil War ended in one brief stroke in the Andrium capital of Verund. Under the advisement of PAX mediators, the Proclamation of Independent Trade was accepted by the Monarch in exchange for a beneficial trade treaty with the former colonies and a commitment to uniting against the growing Za'Cahri threat.

(RPC.2) Promethean War Fleet

Heavy Cruisers and Variants:

(RPC.3) HEAVY CRUISER (CA):

(RPC.6) HEAVY DRONE CRUISER (CAD): A slight modification of the CA, the CAD mounts 6 drone racks in place of the PBT's.

(RPC.7) COMMAND CRUISER (CC): With the success of the Promethean Revolt, it became necessary to develop proper Fleet Flagships. A number of CC's - around 5 to 6 - were completed by converting CA's under construction. For a while there were more CC's than CA's. Several losses prior to Y166 may have been met by further construction, as there were still 5 in service when the first BC's began to replace them. By Y175 the survivors had been relegated to command of independently operating Carrier Squadrons, other command duties being assumed by the BC's, CLC's and DN's. In Y179 the several survivors were given Mech-links to carry a pair of Heavy Fighters.

(RPC.17) HEAVY CARRIER (CV): First constructed in Y169, the CV was modeled on an enhanced Heavy Cruiser hull and saw much action against the Za'Cahri in the Western Powers War.

Light Cruisers and Variants:

(RPC.5) LIGHT CRUISER (CL): Four drone racks complimented by 4 PBT's make the CL a well armed vessel despite its small frame.

(RPC.9) LIGHT SCOUT CRUISER (CLS): This scout unit, based on a CL hull, often doubled as a drone bombardment vessel.

Destroyers and Variants:

(RPC.4) DESTROYER (DD): Heavily armed for a destroyer class, the DD mounts 4 drone racks and 4 PBT's making it one of the most dangerous destroyers in the Western Quadrant despite its lack of phaser power.

(RPC.16) DESTROYER ESCORT (DDE/DDA): The standard destroyer escort as deployed by the Confederacy. Initially produced with Limited Aegis, the DDE was upgraded to include Full Aegis in Y175 changing its designation to DDA.

Frigates and Police Ships:

(RPC.8) POLICE FRIGATE (FF): This is a cheaper, scaled down DD, introduced in Y138 to release DD's for Fleet duty. It was not a great success, but soldiered on until at least Y195 in low risk areas. It was often attached to Auxiliary Carriers as an Escort.

Tug and Pallet Configurations:

(RPC.10) TUG (TUG):

(RPC.11) CARGO TUG (CTUG): This was the earliest Promethean Pallet, being fielded with the first Tugs in Y135.

(RPC.12) BATTLE TUG (BTUG): This first emerged in Y151 to provide the Fleet with a powerful “Extra Heavy Cruiser”. At least three Battle Tugs were fielded, and there were at least three spare Pallets as well. The design influenced the Andrium to develop a similar Pallet for the Tug they were about to field.

(RPC.13) REPAIR TUG (RTUG): This was in service in Y136, just after the cargo tug. The resultant Repair Tug was the most extensively used Promethean Tug, due to its ability to carry out extensive repairs in the field.

(RPC.14) TROOP TRANSPORT TUG (TTUG): Also introduced in Y136, this was used both for troop transport and Assaults. It was usually used to take troops to where they were needed, then put them down into action.

(RPC.15) CARRIER TUG (CVTUG): The Prometheans seem to have developed Carrier Pallets for their Tugs very quickly, and fielded a CVTUG in Y168. From that time they seem to have maintained one in service permanently to cover for any Carriers which were out of service. Several additional Pallets were available for use in emergencies. The CVT carries 200 Spaces of Drones for the Fighters. Escort Group is a CLE and a DDE or DE. From Y172 half of the Ready Racks were altered to re-arm Assault Fighters (i.e. Fighters armed with Proto-Bolt Torpedoes).

Early Years Trade Union Vessels:

(RPC.20) Early Destroyer (YDD): Standard design shared by most corporations amongst the various trade unions, the YDD served primarily as a police escort within the Sorillian Belt.

(RPC.21) Early Medium Destroyer (MYD): An upgraded version of the YDD.

(EPB.1) Proto-Bolt Torpedo

The Proto-Bolt Torpedo (PBT) is the heavy weapon of the Promethean Confederacy and is also used on many pirate vessels. The PBT is a direct fire heavy weapon that transforms warp energy into a small volatile projectile.

(EPB.11) DESIGNATION: Each "PBT" box on the SSD represents one Proto-Bolt Torpedo tube. Each is recorded and fired separately. The PBT is destroyed on "Torpedo" hits on the DAC.

(EPB.12) ARMING: To arm a PBT one unit of energy from any source must be allocated to it on each of two consecutive turns. The PBT must be armed in this 1+1 fashion only. The Proto-Bolt Torpedo may be fired in the second turn of arming.

(EPB.121) HOLDING: If an armed PBT is not fired in the second turn of arming it may be held for a cost of one-half (1/2) point of power (from any source) or it must be discharged harmlessly into space. This discharge can be detected.

(EPB.13) OVERLOADING: A Proto-Bolt Torpedo may be overloaded by arming it with 2 points of power on the second turn of arming instead of the normal 1 point. Reserve Warp may be used to overload a PBT. An overloaded PBT can be held for 1 point of energy from any source.
