ADAPTIVE SHIELDS:

Act similar to normal shields, but with odd facings.
On the first turn the Borg takes damage from a weapon, the damage is normal.
The second turn the Borg takes damage from a weapon, the damage is divided by 2 (round down).
The third turn the Borg takes damage from a weapon, the damage is divided by 3 (round down).
This pattern continues.
Borg take full damage from weapons if no Adaptive Shield faces the damage.

BORG SPHERE RULES:

The Borg Sphere is in the 2 center BRDG boxes.
The Borg Sphere is released when the Borg Cube is destroyed. It cannot be released early unless the two center BRDG boxes are destroyed.
The sphere is immune to explosion damage.
The sphere "remembers" what the main ship was adapting to (so it takes reduced damage).
The sphere can use it's ATimeWR box (indicated as "ATW" on the SSD) to create a Temporal Anomaly. This costs 6 energy, and can be done 2 full turns after the sphere is released.
Any units entering the Temporal Anomaly hex up to 4 impulses later have gone to another time.

BORG BOARDING PARTIES									
									10
									20
									30

* Special H&R Procedure:

DIE ROLL	SYSTEM DESTROYED?	BORG BP RETURNS?
1	No	No
2	No	Yes
3-4	Yes	No
5-6	Yes	Yes

If attacking a non-guarded box, "BP RETURNS?" is always a "Yes".
Borg Boarding Parties cannot guard any box.

BORG OX DRAIN BOLT TABLE

DIE ROLL	RANGE								
	0-1	2-3	4-5	6-7	8-10	11-15	16-24	25-41	42-74

8X Borg Units can assimilate 1d6 PlanetBoxes or 1 Indestructible PlanetBoxes of crew (of any type) or 1 Legendary Officer, per impulse. Each turn, roll 1d6 for each Borg Unit that is away from the Borg ship. On a "1", that Borg Unit reverts back to its original race.

Assimilation Beams:
 Fires 1/turn. Energy Cost = 30 PlanetBoxes. 60 PlanetBox capacitor at 8X.
 If the weapon strikes indestructible boxes, one PlanetBox of whatever was hit is turned into 1 PlanetBox of Borg Units. If the system is an energy field (such as shields), 1 box is destroyed (even though it is indestructible).
 If the weapon strikes normal (damageable) boxes, 10d6 PlanetBoxes are turned into Borg Units. If the system is an energy field, those boxes are simply destroyed.
 The Borg may fire this weapon in "damaging mode", the weapon simply destroys instead of transforming.
 Maximum Range = 4000 hexes, and it auto-hits.

Movement Cost:
 This ship has a movement cost of 0 for two reasons: one, it does not exist in the normal multiverse at all and occupies no space (this is in addition to the more standard Temporal Exclusion Device).
 Secondly, this ship can "blink" instantaneously from any point in the multiverse to any other. This "blinking" may be done only once per impulse, however.
 Turn mode is similar; the ship can change facing to any facing once per impulse.

Opt Allowance	= Infinite
9X Systems	= (none)
Temporal Exclusion Device	
Time/Reality Stability	

[x10000]

[see lower left]

[x10000]

Custom Box Type (□):
 This SSD uses "Custom Boxes", which are used whenever an SSD has an unusual box type. Custom Boxes may not mean the same thing from SSD to SSD; look at the ship's box description.
 This particular ship's Custom Boxes are PlanetBoxes (x10000 Normal boxes) which are indestructible and are 0 space (the ship does not occupy physical space in the space-time continuum, but it does have an apparent size class of -2).

Note every box on the SSD is indestructible. Since it has an indestructible ExcDam box, this ship cannot be destroyed by normal physical damage.
 If a ship has Time/Reality Stability and Local Physical Law Independence, it may transport Boarding Parties to this ship (there is no shielding or ATF in the way).

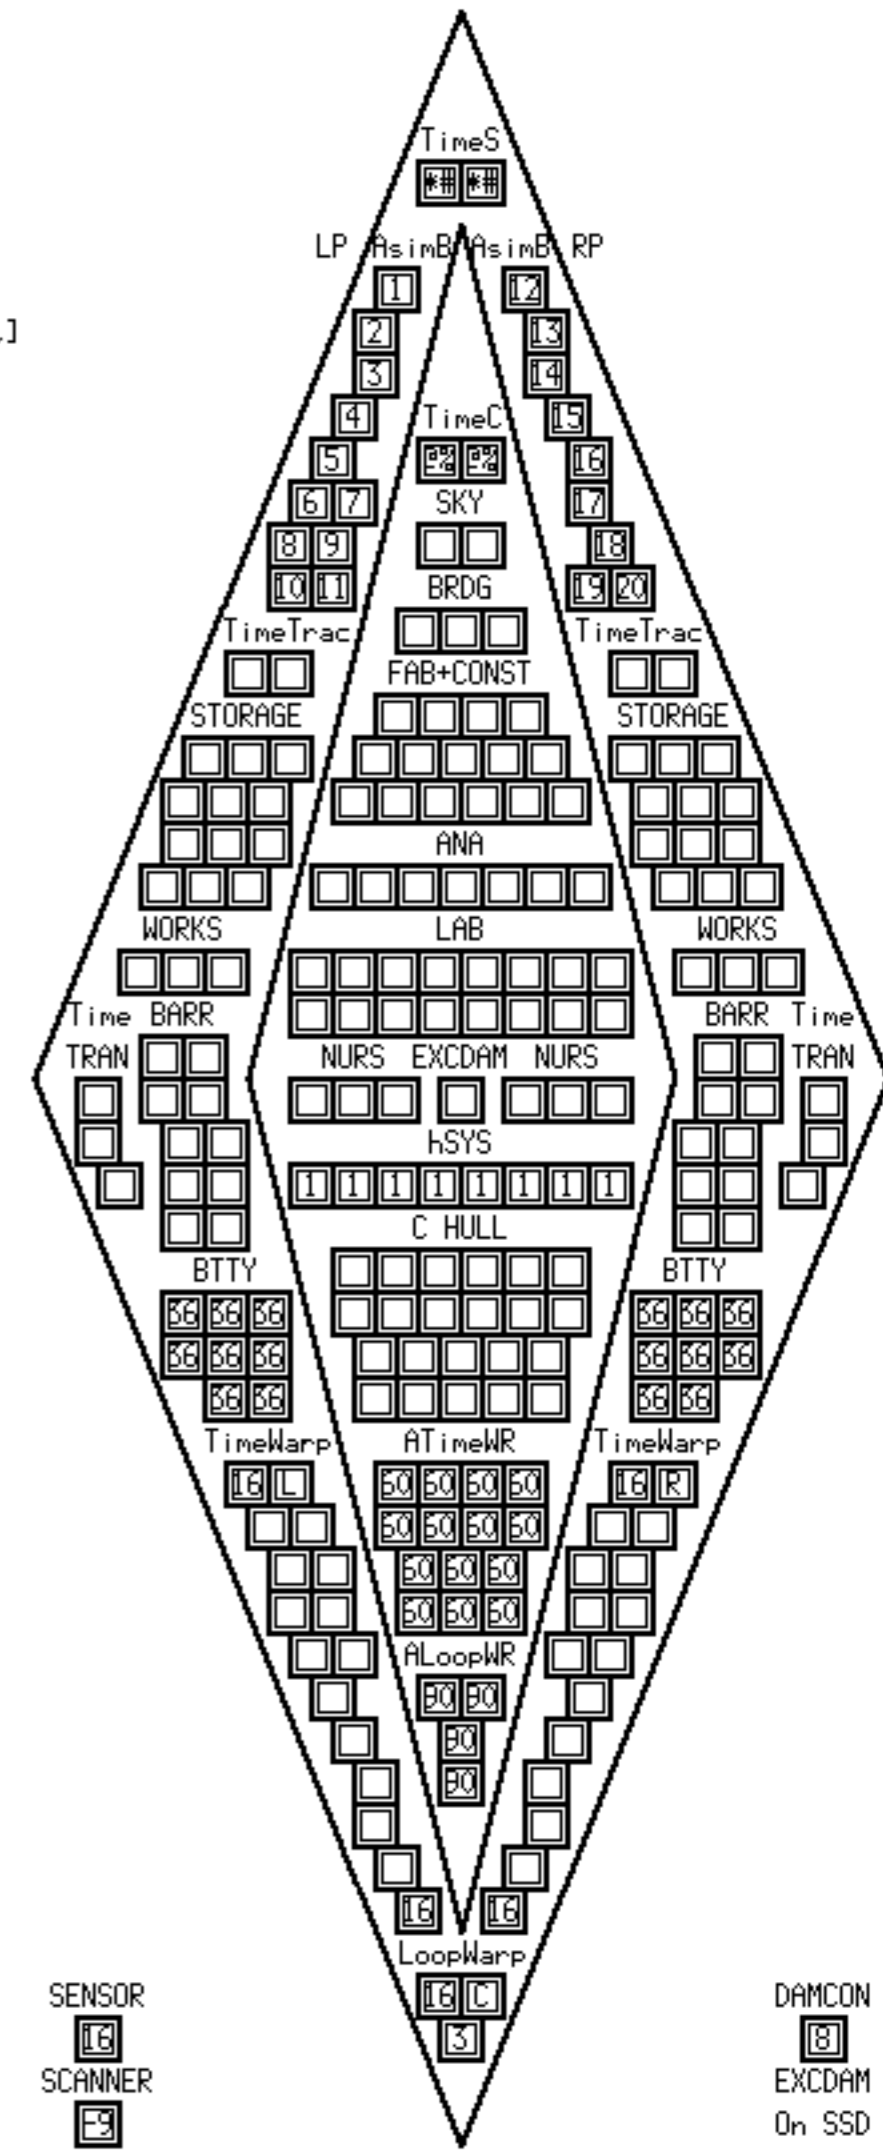

TimeTRAC:
 Besides functioning as a Borg Trac, a unit up to 4 days in the future or past in this hex may be "pulled" into this time for 60 PlanetBoxes of Energy.
 This cannot result in a paradox, so a Borg ship cannot pull itself from the past (for example).

TimeTRAN:
 Besides functioning as a Borg Tran, a crew unit of any type may be transported up to 200 years into the future or past for 10 PlanetBoxes of Energy.
 If the time has been temporally scanned or communicated with, a crew unit may instead be transported to this ship. The crew unit rolls 2d6-2, if the result is below his tech level, he was able to avoid the transport.

TimeWarp:
 Besides functioning as a Borg Trac, a unit up to 4 days in the future or past in this hex may be "pulled" into this time for 60 PlanetBoxes of Energy.
 This cannot result in a paradox, so a Borg ship cannot pull itself from the past (for example).

TimeTRAN:
 Besides functioning as a Borg Tran, a crew unit of any type may be transported up to 200 years into the future or past for 10 PlanetBoxes of Energy.
 If the time has been temporally scanned or communicated with, a crew unit may instead be transported to this ship. The crew unit rolls 2d6-2, if the result is below his tech level, he was able to avoid the transport.

HSYS:
 Hologystems, see the Fed 7X Shuttlecraft SSD.

 First # above is normal damage; Second # is permanent damage.
 If hit target, each further Cutter beam has a -5 range bonus.
 Range bonus is cumulative (i.e. -5 ranger for each hit Cutter)
 Target may modulate Shields to counter, each 1 energy spent reduces range bonus by 2.

BORG DRAIN BOLT TABLE

DIE	DAMAGE AT RANGE						
	0-10	11-20	21-30	31-40	41-50	51-60	61-70
1	15	12	9	6	3	2	1
2	13	10	7	4	1	0	0
3	11	8	5	2	0	0	0
4	9	6	3	0	0	0	0
5	7	4	1	0	0	0	0
6	5	2	0	0	0	0	0

Fires 1/turn; Energy Cost = 20; Cannot be held.
 Shield Mode: Each point above does 1d6 Shield/PA dmg until internals taken, then 3 points above = 1 dmg
 Movement Mode: Each point above causes loss of 2 movements until 0 remaining, then 2 above = 1 dmg
 Damage Mode: Each point above is 1 damage.

						12

* Special H&R Procedure:

DIE ROLL	SYSTEM DESTROYED?	BORG BP RETURNS?
1	No	No
2	No	Yes
3-4	Yes	No
5-6	Yes	Yes

If attacking a non-guarded box, "BP RETURNS?" is always "YES".

Borg Boarding Parties cannot guard any box.

BORG OX CUTTER BEAM TABLE

DIE ROLL	RANGE	11-	16-	21-	31-	51-	81-
1	0 1 2 3 4 5 6 7 8 9 10	11	16	21	31	51	81
2	0 1 2 3 4 5 6 7 8 9 10	15	20	30	50	80	110
3	0 1 2 3 4 5 6 7 8 9 10	15	14	13	12	11	10
4	0 1 2 3 4 5 6 7 8 9 10	14	13	12	11	10	9
5	0 1 2 3 4 5 6 7 8 9 10	13	12	11	10	9	8
6	0 1 2 3 4 5 6 7 8 9 10	12	11	10	9	8	7

Fires 1/turn; Energy Cost = 2; Capacitor = 2.
Treat Cutter Beam as a Phaser.

BORG OX DRAIN BOLT TABLE

DIE ROLL	0-1	2-3	4-5	6-7	8-10	11-15	16-24	25-41	42-74
1	21	18	15	12	9	6	3	2	1
2	19	16	13	10	7	4	1	0	0

Opt Allowance	= 0 (+0)
IX Systems	= (none)
+1 to DamCon rating per Repair box remaining	

ADAPTIVE SHIELDS:
Act similar to normal shields, but with odd facings.
On the first turn the Borg takes damage from a weapon, the damage is normal.
The second turn the Borg takes damage from a weapon, the damage is divided by 2 (round down).
The third turn the Borg takes damage from a weapon, the damage is divided by 3 (round down).
This pattern continues indefinitely.
Borg take full damage from weapons if no Adaptive Shield faces the damage.
