Introduction

Welcome to *TravellerHERO* - the Unofficial Guide for playing Traveller® using the HERO System 5th edition™®. This work is written by fans for fans, and we have no affiliation with Traveller (Far Future Enterprises) or with HERO Games, other than being fans of both.

We have received permission from Traveller's Marc Miller to use Traveller information in this guide, and hope that we have made no infringements. If you feel that a piece of work or art derived from Traveller and used in this guide infringes on your copyright, please inform us so we can remove or modify it, as appropriate.

Traveller Eras

There are four incarnations of Traveller® that we have drawn upon for this guide.

Classic Traveller (the first incarnation) takes place in the Golden Age of the Third Imperium, circa 1105 (approximately 5621 AD).

MegaTraveller (the second incarnation) takes place at the end of the Third Imperium. Emperor Strephon of the Third Imperium has been assassinated, there is a struggle for rulership of the Imperium, and the Rebellion has begun, circa 1116 (5634 AD).

Traveller: The New Era (the third incarnation) follows the time of Rebellion and the aftermath of Virus, circa 1201 (5717 AD).

T4 Traveller (the fourth incarnation) takes place before Classic Traveller, at the beginning of the Third Imperium, circa 0 (4518 AD).

OTHER INCARNATIONS

GURPS Traveller, available from GURPS/Steve Jackson Games, is set in the Golden Age in an alternate branch universe in which Emperor Strephon was not assassinated.

Traveller²⁰, available from QuikLinks and commonly referred to as **T20**, is an officially licensed rules adaptation of Traveller for the d20 system, set at the turn of the millenium in the Gateway sector.

What is TravellerHERO?

Traveller® is science-fiction adventure in the far future, in the Third Imperium. The Traveller® universe does not have the lofty ideals of works like Star Trek; it parallels the European discovery and conquest of the Americas. Many of the parallels are intentional.

As with the 17th century age of sail, Traveller® maintains a “frontier” feel. In that time, the fastest way to get a message to a land across the sea was by ship. In Traveller®, there is no subspace or FTL communication. The fastest way to get information across the sea of space is with a Jump-capable starship. Since each jump takes at least a week, and the largest jump is 18 light years, it can take a year for information to travel from the outer reaches to the core and back.

With the speed of communication limited to the speed of travel, far-off lands tended to rule themselves. In Traveller®,

“the Imperium rules space, the planets rule themselves” is an oft-quoted statement.

Trade is the lifeblood of the Imperium - moving goods from planet to planet, finding new planets as sources of raw materials, find new buyers of goods - and those who interfere with the Imperium's lifeblood learn to regret it sooner or later. Trade wars can be just as deadly as the geopolitical kind.

Traveller® isn't Star Trek, and there's no Prime Directive. You can sell laser pistols to primitives, and advanced computers to railway-age nations at war; just make sure you can make a profit on the deal, and that you don't get caught in the crossfire.

Unsuitable Technology

There are two notable science fiction technologies that are not suitable for Traveller®: *Nanotechnology* and *Cybertech* (including body modifications).

Nanotechnology, which has come to mean self-replicating molecular robots, are not part of the Traveller® universe. Its inclusion would vastly change the way the Traveller® universe works.

Cybertech, the augmentation of body and brain with biotech machines, is also not a part of the Traveller® universe. Machines and technology are tools, nothing more. Such modifications would be as distrusted by the people of Traveller as psionics.

Major Races

Humans aren't the only species in the Milky Way galaxy, or for that matter in the Imperium. Traveller has many minor alien races but only a few major races. Major races are those who discovered Jump Drive technology on their own; minor races were discovered by a major race before achieving Jump Drive technology.

Aslan

For more detailed information on this race, see *Traveller® Alien Module 1: Aslan* from Far Future Enterprises (<http://www.farfutur.net/>)

Aslan Template

The Aslan are a humanoid race whose appearance is vaguely lion-like. Aslan are slightly larger than human, averaging 2 meters tall and 90 kg mass.

The first humans that encountered them described them as lion-like; however they have no biological relations to cats.

Aslan Template

Cost	Powers
3	+3 STR
6	+3 CON
-6	-2 DEX
4	<i>Aslan Hearing</i> : +2 PER with Hearing Group
5	<i>Aslan Eyes</i> : Nightvision
3	<i>Aslan Legs</i> : Running +3" (9" total) (6 Active Points); Increased Endurance Cost (x3 END; -1)

-15	<i>Psychological Limitation</i> : Aslan Code of Honor (Common, Strong)
-15	<i>Psychological Limitation</i> : Aslan Male (Warrior and Leader; Common, Strong) or <i>Psychological Limitation</i> : Aslan Female (Manager and Thinker; Common, Strong)

Males and females are distinguished by the male's larger size and prominent mane. Aslans have a specialized folding dewclaw which folds back into a covering along the thumb.

Droyne

For more extensive information on the Droyne, see *Traveller® Alien Module 5: Droyne* from Far Future Enterprises (<http://www.farfutur.net/>)

Droyne Template

The Droyne are a small race derived from winged herbivorous gatherers. They vary in size depending on which of the six castes they belong to; most are 3 feet tall, but members of the workers and warrior castes are 6 feet tall. The castes are as much physical as they are societal.

Note: Only the **Sport** caste is suitable for use as a player character, unless the GM is running a campaign based solely on a droyne clan.

Droyne Basic Template

Cost	Powers

WARRIOR CASTE

Soldier and marine, police and security, and various high-risk occupations such as firefighter and disaster relief, the warrior caste are well-trained combatants with good strength and agility. They are more common in frontier areas where their services are needed and less common in civilized areas.

The Droyne warrior should take the caste package and the appropriate skill package (soldier, marine, police, etc.).

Humaniti

There are three races derived from Terran humans which exist in the Traveller universe. Those races are the Solomani, Vilani, and Zhodani.

Solomani

The Solomani ("men of Sol") are humans derived from Terran stock. There are no characteristic or skill modification, but see *Traveller Alien Module 6: Solomani* for more detailed information on the Terrans of the Third Imperium.

Vilani

The Vilani are a human major race that developed on Vland from human stock placed there by the Ancients. The Vilani had already built a large star empire (Ziru Sirka) when the Terrans first encountered them. There are no characteristic or skill modifications except for *Longevity (200-year lifespan)*, but see the Traveller Database for more detailed information on the Vilani of the Third Imperium.

Zhodani

Zhodani are a human-variant; their society is heavily based on psionics. For more extensive information on this human race, see *Alien Module 4: Zhodani*.

ZHODANI TEMPLATE

Zhodani are a human variant, descendants of transplanted humans. The main difference is the acceptance and use of Psionics by all Zhodani.

Minor Races

In addition to the major races introduced in Classic Traveller, there are minor races that were introduced in various *Journal of the Travellers Aid Society* articles. Minor races are those which do not have an empire, serve a major race, or do not have colony worlds beyond their homeworld.

Ael Yael

The Ael Yael are an intelligent flying species from Jaeyelya (B-484655-4).

For more detailed information on this race, see *Journal of the Travellers Aid Society #15* from Far Future Enterprises (<http://www.farfuture.net/>).

-5	<i>Physical Limitation</i> : Difficulty utilizing cover Infrequently, Slightly Impairing
Options	
-15	<i>Psychological Limitation</i> : Turns over most earnings to government (Common, Strong)
-15	<i>Psychological Limitation</i> : Distrusts merchants and corporations (Common, Strong)

Career Preferences

Jaeyelya has a small militia army, but no planetary navy or marine service. It is extremely rare to find Ael Yael in Imperial or subsector military units; however, the Scout Service is very popular. Because of their atti-

tudes toward commercial concerns, an Ael Yael character as a merchant is unheard of. Some few may follow Hunter or Belter careers, and all other career types are handled normally.

Mustering out benefits for military service are special, as only 10% of cash benefits go to the individual; the remainder go to the Planetary Development Fund. Material benefits such as passages and equipment are not affected, only cash.

Darrians

The Darrian Confederation is a group of worlds in the Darrian subsector of the Spinward Marches. The Confederation is 20% Solomani, 12% Vilani, 8% Aslan, and 60% Darrian (a minor human race from Darrian).

For more detailed information on this race, see *Journal of the Travellers Aid Society #14*.

Confederation citizens cannot enter Imperial military services, but the Darrians maintain their own Navy, Army, and Marines. However, the Darrians have no Scout Service, so that is not an option. Cutlass skill is not required in the Darrian marines.

Darrian Confederation citizens of any race who travel through the Spinward Marches are most likely to be merchants, common adventurers, retired military personnel, or diplomats.

Dynchia

The Dynchia are a warrior race geneered by the Ancients.

For more detailed information on this race, see *Journal of the Travellers Aid Society #24*.

-15	<i>Psychological Limitation</i> : Stoic (Common, Strong)
4	<i>Warrior Ethic</i> : Choose one weapon familiarity and 1 3-point CSL with that weapon

Career Preferences

Comitia citizens, whether Dynchia or Solomani, can enter the Comitia Navy, Marines or Scouts. Army service is rare on the Dynchia worlds.

All Dynchia and Solomani citizens of the Comitia should have at least one CSL with their chosen weapon because of the society's warrior ethic.

Dynchia should be played as warriors, very touchy of their honor, willing to stoically bear impossible burdens for the sake of their personal/ clan/tribal/racial honor.

Dynchia is free of sexist prejudice - the thought simply does not occur to them. Dynchia engineers know a lot about good design, and can usually improve a device, if it can be improved at all.

Career Preferences

Githiaskio may take civilian or military backgrounds as they wish; the army and marines tend to form "submarine specialist" units, which are attached at corps or army level as needed.

Scouts and Merchants are usually stationed on water worlds.

Hlanssai

The Hlanssai are a humanoid minor race, originating in the Vargr Extents admired for the grace and distrust- ed for their emotional instability.

Career Preferences

Hlanssai characters may become roving artists, entertainers, animal-handlers or adventurers – any profession that does not require discipline or structure. Hlanssai cannot accept discipline, and so rarely find work in large, formal organizations, and never in military service.

Irklan

The Irklan are a human religious sect that settled on Menorb, whose rigorous physical and mental conditioning make the masters of hand-to-hand combat, and reputedly psionics.

Newts

Also known as Bwaps or Wabs, (from their name for themselves, Bawapakewaa-a-awapawab), the newts originated on Marhaban, in the Lentuli subsector.

Options	
15	<i>Psychological Limitation</i> : Obsessed With Minutiae, Patterns, And The Order Of Things (Common, Strong)

Newt Career Preferences

Newts are less likely to be accepted in the marines or the army, and more likely to be accepted in the Scout Service, Merchants, and other professions. Those Newts in military service are restricted to defense of Newt worlds.

Newt psychology about order and minutia keep them from learning gambling, forgery, or streetwise skills. The Newts make excellent bureaucrats, officials, mathematicians, bookkeepers, scientists, and historians. Newts are unlikely to make good spies, as they will not lie, they will not break the law unless doing so will restore balance to the universe, and they will not obey orders which are disruptive to the universe.

The Sword Worlders

The inhabitants of the various planets of the Sword Worlds Confederation (collectively called Sword Worlders) are a major presence in the Spinward Marches. Although they are not a separate race, they are sociologically and culturally different enough to warrant treatment in Contact.

For more detailed information on this group, see *Journal of the Travellers Aid Society #18*.

Sword Worlders Template

Use standard human template.

Sword Worlders Career Preferences

The main thing to remember is their extreme pride and demand for personal respect. Their low opinion of non-Sword Worlders (especially the Zhodani, because of their use of psionics) will cause much friction between them and outsiders (until the outsiders have proven themselves worthy of friendship). Bear in mind, however, that they are not fools, and will not enter into fights they cannot win.

SWORD WORLDS PATROL SERVICE

Use the Scout Service template. Only open to members of the Sword Worlds.

-20	<i>Psychological Limitation</i> : Does Not Take Orders / Expects Cooperation (Common, Total)
-15	<i>Psychological Limitation</i> : Individualistic / Not Ambitious (Common, Strong)

Virushi Career Preferences

Virushi found off their homeworld are most likely to be engaged in a career which stresses service to others;

others are often found in work which caters to their highly individualistic way of life. Their great dexterity makes them excellent doctors - a Virushi surgeon was recently elevated to the emperor’s personal medical staff. An extreme dedication and a fervor to help others characterizes such Virushi encountered in jobs of this kind.

Because they will not take orders, Virushi do not join the military, though their great size would make them fearsome fighters. Many an Imperial drill sergeant has been heard bemoaning the fact that such perfect fighting machines are also pacifists who don’t even understand the concept of war. In their chosen fields, however, the Virushi have distinguished themselves on many occasions.

Virushi sense of independence makes joining the military services (Army, Navy, Marines, Merchant Marines) extremely unlikely, as the Virushi refuse to take orders.

The Scout Service appeals to their independent nature, is an agreeable career choice. In fact, any career that stresses independence and individualism is a good choice – doctor, scientist, belter, free traders, etc.

Note: Since the Virushii are peaceful and non-aggressive by nature, they naturally gravitate toward positions in the medical or scientific fields.

Most Virushii should have the Scholar or Scientist Skill Enhancers (or even both of them).

Most Virushii should have Knowledge and/or Science Skills in either the medical profession or a scientific field of study.

The New Era Races

The majority of Coalition member races in The New Era are humans, although there is one non-human member — the Schalli. The Hivers are not members of the Coalition, but are assisting the humans in rebuilding themselves into an interstellar community.

Profession Templates

This section contains Profession Templates (a.k.a. Package Deals) for a Traveller campaign. As with Terran Empire, it is broken into Imperial & Government Templates, and Civilian Templates.

In addition to these packages, see *Star Hero*, *Terran Empire*, and *Alien Wars* for other packages that may be appropriate.

The HERO System calls these Package Deals, but there are no “deals” or discounts for taking these packages. They are actually templates, representing the minimum skills a character must have to be a member of that profession. The purpose of these templates is ease and consistency.

Imperial And Government Templates

These templates represent government officials and members of the Imperial Military services. If the GM is running a military campaign, characters should take the entire template. If the characters are ex-military, they should take all of the skills in the template, but not the disadvantages, since they are no longer under military control.

Imperial Court and Bureaucracies

BUREAUCRAT

For the Imperial level bureaucrat, use the Bureaucrat package in *Terran Empire*, pg. 106.

COURTIER

For court attendees and messengers, use the Courtier package in *Terran Empire*, pg. 106.

DIPLOMAT

For standard diplomats, use the Diplomat package in *Terran Empire*, pg. 107, but with the following modifications:

Add *Contacts* (Diplomat, Foreign official, etc.), 3 points.

NOBLE

For planetary nobles (like the ruler of Leedor in *The Traveller Adventure*), use the Noble package in *Terran Empire*, pg. 107, and:

Add *Contacts* (court contacts), 3 pts.

SENATOR

For Senators and Representatives, use the Senator package in *Terran Empire*, pg. 108, but change the major contact from Empress Marissa to Emperor Strephon.

Law Enforcement and Intelligence

IMPERIAL LAW ENFORCEMENT

For Imperial Law Enforcement, use the ISP Officer package in *Terran Empire*, pg. 108, but:

Change the rivalry from TSS to Planetary Law Enforcement

Add *Contacts* (other law enforcement personnel, snitches, etc.), 3 points.

PLANETARY LAW ENFORCEMENT

For planetary Law Enforcement, use the Planetary Law Enforcement package in *Terran Empire*, pg. 109, but:

Add *Contacts* (other law enforcement personnel, snitches, etc.), 3 points.

IMPERIAL INTELLIGENCE FIELD AGENT

For Imperial Intelligence field agents, use the TIC Field Agent from *Terran Empire*, pg. 109, but:

Add *Contacts* (other intelligence operatives, friendly foreign agents, informers, etc.), 3 pts.

IMPERIAL INTELLIGENCE ANALYST

For Imperial Intelligence analysts, use the Analyst Package Deal from *Dark Champions*, pg. 39, but:

Add *Contacts* (other intelligence operatives or analysts, friends with “interesting” but useful hobbies, etc.), 3 pts.

IMPERIAL INTELLIGENCE OPERATIVE

For Imperial Intelligence operatives (covert or undercover), use the TIC Undercover package from *Terran Empire*, pg. 110, but:

Change *WF: Human Advanced Small Arms* to *WF: Beam Weapons*

Add *Contacts* (people in useful jobs, informers, etc.), 3 pts.

Military Services

The Imperium has six services: Imperial Navy (Space Navy), Imperial Marines, Imperial Army, Imperial Scouts, Imperial Merchant Marine, and Imperial Intelligence (“Other” in *Traveller Book 1*).

Imperial Navy

The Imperial Navy (based on *Traveller Book 5: High Guard*) is the primary star-faring armed force of the Imperium. Its duties include keeping peace and order across the spacelanes of the Imperium.

The Imperial Navy is divided into three general categories: *Imperial Forces*, who are directed by and responsible to the central ruling Imperium authority; *Subsector Forces*, who patrol their specific subsectors; and *Planetary Forces*, who are assigned to or raised from an individual world in the Imperium.

Each *Term of Service*, or *Enlistment Period*, is a four-

year hitch.

The Imperial Navy has six branches of service: Flight, Engineering, Medical, Gunnery, Technical, and The Line (Command).

IMPERIAL NAVY COMMAND

For Imperial Navy command personnel, use the Imperial Navy Command package deal in Terran Empire, pg. 114, with the following modifications:

Change *AK: The Milky Way Galaxy* to *AK: The Imperium*

Add *KS: Leadership 11-*

Add *KS: Fleet Tactics 11-*

Add *Contacts* (Navy shipmates, Starport barkeeps, etc.), 3 pts.

This increases the cost of the package by +7 points.

Option: Choose one of the following perks: Decoration - MCFU (1 pt), Decoration - SEH (2 pts)

IMPERIAL NAVY FLIGHT SCHOOL

For Imperial Navy Flight School personnel, use the Imperial Navy Flight package deal in Terran Empire, pg. 115, with the following modifications:

Change the Navigation subcategories to *Air, Space, Hyperspace*

Change *AK: The Milky Way Galaxy* to *AK: The Imperium*

Add *Contacts* (Navy shipmates, Starport barkeeps, etc.), 3 pts.

Navy pilots are officers, so the Fringe Benefit will vary by rank.

IMPERIAL NAVY ENGINEERING

Traveller/High Guard doesn't differentiate between Lifesystems and Propulsion — it's all part of the engineering branch. Use the Imperial Navy Propulsion package deal from Terran Empire, pg. 115, but with the following modifications:

Add *KS: Emergency Damage Control 11-*

Add *KS: Gravitics 11-*

Add *Contacts* (Navy shipmates, Starport barkeeps, etc.), 3 pts.

This increases the cost of the package by +7 points. Starship engineers may optionally add *SS: Naval Architecture 11-*

Those serving as Lifesystems/Environmental engineers should pick the proper System Operations subcategory(s) and Science Skills.

IMPERIAL NAVY SCIENCE AND SENSORS

Science and Sensors is considered part of the Command Branch. Use the Imperial Navy Science and Sensors package deal in Terran Empire, pg. 116.

Add *Contacts* (Navy shipmates, Starport barkeeps, etc.), 3 pts.

IMPERIAL NAVY SECURITY

Most Security Duties are handled by the ship's Marine contingent. See Imperial Marine (Enlisted) below.

IMPERIAL NAVY GUNNERY OFFICER

For Imperial Navy Gunnery Officer, use the Imperial Navy Tactical package deal in Terran Empire, pg. 115, with the following modifications:

Change the WF to *WF: Small Arms*, *WF: Beam Weapons*, and pick two of the following *Vehicle Weapons* (*Lasers*, *Missiles*, *High Energy*, *Meson*, or *Particle Weapons*)

Add *WF: Ships Screens* (1 point)

Change *KS: Thorgon Military 11-* to any one of the following: *Zhodani*, *Solomani*, *Vargr*, *Aslan* or *K'Kree*

Add *Contacts* (Navy shipmates, Starport barkeeps, etc.), 3 pts.

The changes increase the cost of the package by +4 points.

Imperial Marines

Though the Marines are an offshoot of the navy, Traveller treats them as an Army offshoot (Book 4, Mercenary).

For Imperial Marines, use the Imperial Marine Enlisted (and Officer, if applicable) package deals in Terran Empire, pg. 114, with the following modifications:

IMPERIAL MARINE ENLISTED

Use the Imperial Marine (Enlisted) package deal from Terran Empire, pg. 114, but with the following modifications:

Remove *Radio Implant*

Add *PS: Battledress* (DEX; 3 points)

Add *KS: Emergency Damage Control 11-*

Add *Environmental Movement: Zero G* (4 points)

Add *WF: Cutlass*

Add *Contacts* (Marine buddy, Starport barkeeps, etc.), 3 pts.

The overall cost of the package increases by +2 points.

IMPERIAL MARINE OFFICER

Use the Imperial Marine (Officer) package deal from Terran Empire, pg. 114, but add *High Society*.

Imperial Army

COACC - IMPERIAL ARMY AIR CORP

Use the Imperial Army (Air Force) package deal in Terran Empire, pg. 111.

Add *Contacts* (Army buddy, Starport barkeeps, etc.), 3 pts.

IMPERIAL ARMY CAVALRY - ARMOR

Use the Imperial Army (Armor) package deal from Terran Empire, pg. 111, but with the following modifications:

Systems Operations choice should be *Communications (Commo)* or *Sensors*

One of the TFs should be *TF: Grav Vehicles*

Change the WF to *WF: Small Arms* and *WF: Vehicle*

Weapons (1 point)

Add *Contacts* (Army buddy, Starport barkeeps, etc.), 3 pts.

This increases the package cost by +4.

IMPERIAL ARMY ARTILLERY

Use the Imperial Army (Artillery) package deal from Terran Empire, pg. 111, but with the following modifications:

Systems Operations choice should be *Communications (Commo)* or *Sensors*

One of the TFs should be *TF: Grav Vehicles*

Add *KS: Forward Observer 11-*

Change the WF to *WF: Small Arms* and either *WF: Vehicle Weapons (1 point)* or *WF: Artillery Weapons (1 point)*

Add *Contacts* (Army buddy, Starport barkeeps, etc.), 3 pts.

The total package cost is increased by +6 points.

IMPERIAL ARMY INFANTRY

Use the Imperial Army (Infantry) package deal from Terran Empire, pg. 112, but with the following modifications:

Change *WF: Human Advanced Small Arms* to *WF: Beam (Laser) Weapons*

Remove *Demolitions*

Add *WF: GP MG, GL, and Shoulder Fired*

Add *Contacts* (Army buddy, Starport barkeeps, etc.), 3 pts.

IMPERIAL ARMY MEDICAL

Use the Imperial Army (Medical) package deal from Terran Empire, pg. 112, but with the following modifications:

TF: Grav is the most common choice for the TF.

Add *Contacts* (Army buddy, Starport barkeeps, etc.), 3 pts.

IMPERIAL ARMY OFFICER

Imperial Army Officer is an add-on to any of the other Imperial Army packages, and can be used without modification. See Terran Empire, pg. 112.

IMPERIAL ARMY WET NAVY

Use the Imperial Army (Sea Forces) package deal in Terran Empire, pg. 113.

Add *Contacts* (Army buddy, Starport barkeeps, Ocean port barkeeps, special someone in port, etc.), 3 pts.

IMPERIAL ARMY SPECIAL FORCES

Use the Imperial Army (Special Forces) package deal from Terran Empire, pg. 113, but with the following modifications:

Remove *Armorskin* and *Radio Implant*

Add *PS: Battledress* (DEX; 3 points)

Add +1 *PER* (3 points)

Add +1 *Tracking* (2 points)

Add +1 *Concealment* (2 points)

Add +1 *Stealth* (2 points)

Add *Environmental Movement: Zero G* (4 points)

Add *Contacts* (Army buddy, Starport barkeeps, etc.), 3 pts.

The overall cost of the package increases by +5 points.

HIVER MERCHANT

Use the Trader package deal from Terran Empire pg 121, but change High Society/Streetwise to Systems Operation: Computer, and add Language: Anglic (fluent, literate)

Vargr Professions

VARGR MERCHANT

Use the Trader package deal from *Terran Empire* pg. 121, but add the following:

Cost	Skills
2	WF: Small Arms OR WF: Beam Weapons
3	Brawling (+1d6 HA)
3	PS: Zero G (DEX)
4	Environmental Movement: Zero G
Option	
9	<i>Group Leader</i> : Persuasion +1 and PS: Leader (PRE) +1

This increases the package cost by +12 (+21 for the group leader).

VARGR RAIDER

Use the Pirate package deal from Terran Empire, pg. 118, but change AK: Milky Way to AK: Vargr/Imperium Border, change WF: Advanced Small Arms to WF: Beam Weapons, add Brawling, PS: Zero G, Tactics (Ground), and Tactics (Starship).

And for the group leader, add:

Persuasion +1

PS: Leader (PRE) +1

Aslan Professions

ASLAN MERCENARY

Aslan mercenaries are typically male, although members of a mercenary team may be male or female since the females handle the logical and tactical aspects. For mercenaries who are NOT ex-military, use the Mercenary package deal from Terran Empire, pg. 122, but with the following modifications:

Change...

For mercenaries who are ex-military, use the appropriate Army, Navy, or Marines package, but add Fringe Benefit: Mercenary License (1 point) and TF: Grav Belt (1 point). For males, add Leadership and Ground Tactics. For females, add choice of Logistics, Tactics, Gravitics, Paramedic, or Science Skills.

ASLAN ASSASSIN

Not really an assassin, more of a professional duelist, the Aslan assassin finds those who have dishonored themselves and the Aslan race, and challenges them to one-on-one mortal combat. All Aslan assassins are male.

Use the Assassin package deal from Terran Empire pg. 117, but change the Disadvantage to Psychological Limitation: Aslan Code Of Honor (Common, Strong).

Zhodani Professions

ZHODANI NOBLE

Zhodani nobles are the leaders of their society.

WF: Small Arms OR WF: Beam Weapons

Any 3 skills from the following list: Bureaucratics, Conversation, Persuasion, Trading

Any 3 psionics from the following list: Telepathy Group, Telekinetics/Telephysics Group, Teleportation Group, Teleperception (Clavoyance) Group, Self Group, or Arcana(Other) Group.

ZHODANI INTENDANT

Zhodani intendants are middle-management aides to Nobles.

WF: Small Arms OR WF: Beam Weapons

Any 3 skills from the following list: Bureaucratics, Conversation, Persuasion, Trading

Any 3 psionics from the following list: Telepathy Group, Telekinetics/Telephysics Group, Teleportation Group, Teleperception (Clavoyance) Group, Self Group, or Arcana(Other) Group.

ZHODANI GUARD

The Zhodani Guard as psionic combat troops, and usually are organized in battle groups from the size of a squad up to the size of a battallion. There are three types: scramblers, directors, and teleporters. Scramblers use Telephysics to disrupt enemy forces; directors use Telepathy or Teleperception to locate enemy

forces; teleporters use their abilities to move swiftly to the battlefield and take advantage of the elements of surprise and position.

Use the Imperial Army package from Terran Empire pg. 1xx, but add TF: Grav Belt and either Telepathy, Teleperception, Telephysics, or Teleportation psionics of Rank 5 or greater.

Droyne Professions

DROYNE SPORT

Droyne sports may take any package which serves the need of their clan: Explorer, Pilot, Diplomat, Belter, etc.

Game Elements

Characters created for a TravellerHERO campaign use most of the game elements – Skills, Perks, Talents, Powers, and Disadvantages – as they are given in the HERO System rulebook, with some of the modifications given in Star HERO. Some special notes are necessary for the TravellerHERO setting.

Characteristics

Characteristics are important for all HERO settings, but here are some notes on their use in a TravellerHERO game.

TravellerHERO characters tend to be more “realistic” characters rather than movie-style characters, and are assumed to be based on either 75 Base Points +50 Disadvantage Points, or 100 Base Points+50 Disadvantage Points. Characters with more than 50 points in disadvantages tend to have more of a movie or superhero feel.

Characters in a TravellerHERO setting have primary characteristics mainly in the 8-13 range, with some rare 15's. But most characters have aged through the military service route, and have had most of their characteristics lowered through aging (Age 40+ and Age 60+). To maintain this feel, most characters should have no more than one or two characteristics in the 15 range, and most in the 8-13 range.

STRENGTH

Except for HTH Combat and STR Min for weapons, STR is less important in a TravellerHERO game. With cargo-loading robots and heavy-work machinery, most humans in the Imperium will have STR in the 8-13 range.

However, geneering (genetic engineering) was practiced by the Ancients (see the Vargr) and even by other human races in the past. The GM may design genetically engineered humans (such as the Heavyworlders, Martians, and Selkies) on far off worlds with enhanced characteristics.

DEXTERITY

As with STR, DEX in the Imperium is not usually important except in combat and certain skills.

If the GM wishes to keep the DEX in the 8-13 range, he can allow characters to buy 5-point levels with DEX-Based Skills, 3-point levels with a cluster of skills (e.g. *Light On His Feet: +1 with Acrobatics, Breakfall, and PS: Dance*), Lightning Reflexes, or additional DEX with the limitation *Only For DEX Rolls* (-1). This keeps character's CV within the norm, but allows the DEX-Based skills to become heroic.

INTELLIGENCE

In a high-tech universe like Traveller, INT is very important, since so many tech skills are INT-Based. If

the GM wishes to allow higher rolls but not have everyone running around with an 18+ INT, he can allow the character to buy 5-point levels with INT-Based Skills, or 3-point skill levels with clusters of skills (e.g. *Specialist: +1 with Electronics, Mechanics, and Computer Programming*).

Skills

Star HERO discusses some special rules for Skills in a Science Fiction campaign (see Star Hero 39-48). Some of these rules apply to TravellerHERO.

For information on skill roll penalties in dealing with alien or obsolete/advanced technologies, see Star Hero pages 143-144.

BREAKFALL

See *Star HERO page 40* for using Breakfall in Zero G.

COMPUTER PROGRAMMING

Use *Computer Programming* to create, program, and modify computer systems; use *Systems Operation: Computers* to operate computers and computer-based applications. Note that TravellerHERO uses the single *Computer Programming* skill, without subcategories.

ELECTRONICS

TravellerHERO uses *Electronics* to fix electric and electronic devices, and does not use subcategories.

HIGH SOCIETY

High Society applies as a default to Imperial Society, except for those societies with no connection to the Imperium. Appropriate Culture Knowledges can be used as complementary skills for other cultures.

INVENTOR

See *Star HERO page 42* for using *Inventor* to create appropriate devices.

LANGUAGES

There are translation computers for some of the well-known languages, but no Universal Translators like Star Trek, so languages are important.

In Traveller, the Imperial language is Galanglic, a descendant of the English language. But various sectors and worlds have their own languages, and so building a language tree would be a daunting task. Assume that any alien language from a different world (alien to the speaker) costs +1 point if the communication mode is the same (e.g. speaking), but costs more if there are differences in the methods. See *Star Hero pages 43-44* for appropriate cost modifiers.

MARTIAL ARTS

Within the Imperium, there are innumerable martial arts styles. With so many styles, it is recommended to abolish the Martial Arts Style disadvantage, as it

wouldn't be truly limiting.

Brawling is simulated in TravellerHERO with one or two dice of *Hand-To-Hand Attack*, and one or two levels with *HTH Combat*.

It's recommended that for Imperial forces (Army, Navy, Marines, Intelligence, etc.) with **advanced** Martial Arts training, the GM select a particular style of Martial Arts learned by that Imperial Force. It could be, for example, that all Imperial Marines learn *Zero Gravity Combat* from *The Ultimate Martial Artist page 87*. while all Imperial Intelligence personnel learn *Krav Maga* from *The Ultimate Martial Artist page 37*.

MECHANICS

Use *Mechanics* to repair engines, power plants, vehicles, and such other devices. Most of these devices require advanced tools to work on them

NAVIGATION

Navigation (Space) and *Navigation (Hyperspace)* are required for travel with Maneuver drives and Jump drives, respectively.

PARAMEDICS

Paramedic in Traveller applies regardless of species, but the GM should apply modifiers based on the alienness of the target species. See *Terran Empire page 124* for appropriate modifiers.

PROFESSIONAL SKILL: ZERO G OPERATIONS

Professional Skill: Zero G Operations is a DEX-Based professional skill. For more details, see *Star HERO pages 45-46*.

SURVIVAL

See the Planetary Similarity table in *Star HERO page 47* in regards to terrains on divergent worlds.

SYSTEMS OPERATIONS

In TravellerHERO, *Systems Operation* is broken out as follows:

Communications

- Radio Wave
- Light Wave
- Communication Jammers

Environmental

- Life Support
- Personnel Support
- Recreational Support

Medical

- Medical Sensors
- Medical Systems and Autodoc

Sensors

- Medical Sensors
- Passive Detector Sensors
- Radar
- Lidar
- Sonar
- Sensor Jammers

Weapon Systems

- RCM (Remote Controlled Missiles)

RCV (Remote Controlled Vehicles)

TRANSPORT FAMILIARITY

Transport Familiarities for TravellerHERO are broken out as follows:

Common Motorized Ground Vehicles

- Hovercraft
- Antigrav
- Tracked
- Wheeled

AGrav Harness

Air/Raft

Personal Use Spacecraft

- Small (under 200 Displacement Tons)
- Large (over 200 Displacement Tons)

Commercial Spacecraft

- Small
- Large

Industrial Spacecraft

- Small
- Large

Military Spacecraft

- Small
- Large

Mobile Space Stations

- Small
- Large

WEAPON FAMILIARITY

Weapon Familiarities in TravellerHERO are broken out as follows:

Small Arms (aka Slugthrowers)

(May be purchased as a group)

- Assault Rifles/LMGs
- Pistols/Handguns
- Rifles
- Shotguns
- SMGs
- Thrown Grenades
- Gauss Weapons
- Mini Rocket/Missile Guns
- Tranquilizer Guns

Uncommon Military Arms

(Must be purchased separately)

- Flamethrowers
- Grenade Launchers
- Heavy Machine Guns
- Shoulder-fired Weapons

Emplaced Weapons

(May be purchased as a group)

- Anti-Aircraft Guns
- Anti-Tank Guns
- Artillery
- Howitzer
- Mortar
- Recoilless Guns

Vehicle Weapons

(Must buy per vehicle)

- Hovertank weapons (for example)

Beam Weapons

(May be purchased as a group)

- Laser Pistols/Handguns
- Laser Rifles
- Laser Assault Rifles

Energy Weapons

(May be purchased as a group)

- Plasma Guns
- Fusion Guns

WEAPONSMITH

Weaponsmith is broken out into the same subcategories as the Weapon Familiarities.

Perks

Most perks apply normally in a TravellerHERO campaign.

ACCESS

Access can also represent a safe haven for a ship, such as a hidden base for a pirate ship or merchant ship. At this level, the cost is 5 points. Each -1 to find the safe haven is +1 point to the cost.

ADVANCED TECH

Advanced Tech represents a character whose homeworld or technological know-how gives him access to equipment at a higher tech level than the norm. The Standard Tech Level in TravellerHERO is TL12, although certain areas have TL15.

Note that a character could also take Low Tech to represent a character from a lower technology world or culture.

For more information, see *Star HERO* page 48.

HIGH TECH**+3 points per TL above 12**

The standard starting Tech Level in Traveller, is TL12. A character with high-tech training may buy Advanced (High) Tech at 3 points per higher TL, up to a maximum of TL15. The character must be able to justify this purchase to the GM. Note that the usual modifiers apply as far as obsolete/advanced tech usage for others trying to use such equipment.

LOW TECH**-3 points per TL below 12; max -15 points.**

A character from a low-tech world may buy this disadvantage to represent coming from a backward world or culture. Low Tech as a disadvantage is worth 3 points per TL below 12, with a maximum value of 15 points (5 levels). A low tech character is penalized when using or opposing high tech equipment, with -1 per TL difference to the following skills: Bugging, Computer Programming, Criminology, Cryptography,

Electronics, Forgery, Lockpicking, Mechanics, Security Systems, Systems Operation, Weaponsmith. In addition, certain skills may simply be unavailable.

COMPUTER LINK

Computer Link can represent access to Imperial Army or Navy databases, Imperial Intelligence database, Imperial Law Enforcement databases, etc.

CONTACT

Contacts can be very important. Characters usually gain 1 contact for every term in service, and these contact are related in some way to the career (buddies from the unit for armed forces, agents or government officials for spies, and so forth).

FRINGE BENEFITS**IMPERIAL DATA ACCESS CARD****Cost: 1 point**

This permit allows the ship to download the latest non-sensitive information from a world's Imperial dataset, and costs 1 point.

Note that such information is only as current as the updates from the latest Xboat run.

STARSHIP MASTER LICENSE**Cost: 2 points**

This is appropriate for most Traveller campaigns, where the characters are travelling around in their own starship.

LICENSED PSIONIC**Cost: 1 point**

This may apply during certain periods of Traveller.

TRAVELLER'S AID SOCIETY (TAS) MEMBERSHIP**Cost: 5 points**

You are a member of the Traveller's Aid Society. This gives you one middle passage per month, and any reasonable access and aid from the Traveller's Aid Society. This perk costs 5 points.

POLICE POWER

See *Star Hero* page 49 for costs of Planetary Police Powers versus Imperium Police Powers.

MILITARY RANK

See *Terran Empire* page 126.

HEAD OF STATE**Cost: 10-25 points**

For characters who are the head of state of a nation up through an interstellar society, use the values in *Star Hero* page 49.

STATUS

(5/level)

You are politically important. For one level, you govern 1-10 thousand people, and have a personal staff

of one. Each additional level increases the number of people by a factor of ten, and doubles staff. You should also take as many levels of wealth as you have levels of governor. Note that while status indirectly gives you control over a lot of money and people, it also seriously restricts what you can do with those resources, which is why it is so cheap. In order to govern a world, you need (pop digit - 3) levels of this advantage; a subsector duke usually has 7 levels, sector dukes usually have 8, grand dukes 9, the emperor has 10. PCs should rarely have significant levels of status.

MONEY

Money and commerce are big deals in TravellerHERO, especially since equipment is purchased with money. Characters can buy Money to represent investments, a trust fund, or other source of income. The table below is broken out for the Raw CR per year, what that translates to for Monthly income, and the MAT (Monthly After Taxes) income. The GM should consider the MAT to be the character's "disposable" income - that is, what he has available to spend each month after normal expenses - taxes, food and equipment upkeep, etc.

Points	Raw CR/year	Monthly After Taxes & Expenses
0	75,000	1,875
1	100,000	2,500
2	200,000	5,000
3	300,000	7,500
4	400,000	10,000
5	500,000	12,500
6	1,000,000	25,000
7	2,000,000	50,000
8	3,000,000	75,000
9	4,000,000	100,000
10	5,000,000	125,000

Because so much of Traveller has to do with commerce and making money, the GM should be careful about letting character buy the money perk. Those characters who have mustered out of the military after many years and rank could have up to 2 points of Money, but rarely more.

REPUTATION

Decorations receive for valor under fire are treated as Reputation (8-, Small Group). It is treated as Small Group as far as the entire Imperium is concerned.

DECORATIONS

- Decorations are treated as a positive Reputation.
- Meritorious Conduct Under Fire (MCUF)
- Medal for Conspicuous Gallantry.
- Starburst For Extreme Heroism.

VEHICLES AND BASES

Normally in heroic campaigns vessels and bases are purchased with cash. However in TravellerHERO,

characters pay points to start out with a vessel.

SCOUT SHIP

Cost: 15 points

You are an ex-scout, and have a scout ship. This is yours to use within limits; you may not sell it, half of any profits must be turned over to the Imperium, and you are subject to having your service re-activated if the Imperium needs you (assume normally 8- to occur). Note that this is vastly lower than the point cost of a scout.

MERCHANT VESSEL

Cost: 10-30 points

You have the down payment on a merchant ship, plus personal wealth of 500,000 credits. This can also apply to a Yacht or Safari ship.

Points	Years of Payments Left
10	40 years
15	30 years
20	20 years
25	10 years
30	Clear Title

Talents

ABSOLUTE TIME SENSE

May represent a psionic ability or simply a facet of a highly structured intellect. May also be used with android or robotic characters, if such are allowed by the GM.

DANGER SENSE

May represent a psionic ability of some type.

EIDETIC MEMORY

May represent psionics or simply a person with a well-regimented mind. May also be used with android or robotic characters, if such are allowed by the GM.

ENVIRONMENTAL MOVEMENT

See *Star HERO page 51* for information on the three space-faring types: Zero G, High G, and Low G.

HOTSHOT PILOT

May apply, but use with caution.

LATENT PSIONIC

Latent Psionic is available for 5 points, for characters who want to later learn psionics. Characters who do not start with either this talent or with psionics should not normally be allowed to buy psionics later.

SIMULATE DEATH

Applies to monkish types, and may also represent a psionic ability. It can also be used to represent "power-down mode" in some android or robotic characters.

UNIVERSAL TRANSLATOR

May represent an unusual psionic ability. With proper limitations, may also represent an android or robotic character's array of learned languages and linguist skill.

Disadvantages

Most disadvantages apply normally, although TravellerHERO characters tend to have fewer disadvantages not directly related to a race or profession (typically 50 points in Disadvantages is the maximum).

AGE

The Traveller character generation system takes great pains to modify characteristics at various physical ages. Age 40+ and Age 60+ disadvantages apply in those cases.

DEPENDENCE

Not typical to a Traveller campaign.

DEPENDENT NPC

Not typical, although could apply to an Aslan male with a female at his side not purchased as a follower.

DISTINCTIVE FEATURES

Distinctive Features can be used normally, although Distinctive Features used to represent only racial difference should be worth 5 points less.

Walking into a room with 20 Aslan and 20 humans, passing an Aslan is only notable. Passing an Aslan with a fiery red mane and a deep voice is distinctive.

ENRAGED/BERSERK

Not typical, but may apply based on concept.

PHYSICAL LIMITATION

Usually applies to size or to gravity differentials. See *Star HERO pages 63-64* for size and gravity related costs.

PSYCHOLOGICAL LIMITATION

By far the most common character limitation.

Some sample psychological limitations include: Code of Honor, Cowardly, Generous, Greedy, Compassionate, Selfish, Brave, Cowardly, Friendly, Distrustful, Ambitious, Ruthless, Confident, Arrogant, Protective Of Others, Violent/Killer, Loyal To Friends, Out For Self Only, and so forth.

REPUTATION

Somewhat rare, but may apply based on background.

SOCIAL LIMITATION

Various social limitations may apply, such as *Subject To Orders* or *Second-Class Citizen*, as appropriate.

SUSCEPTIBILITY/VULNERABILITY

Not typical, although may apply to non-human races such as an aquatic race that dries out when not in water and may eventually die if not returned to the water.

Psionics

Characters can only purchase psionics with the GM's permission. See the chapter on *Psionics and the Psionics Institute* for powers and costs.

Conversion Notes**CONVERTING CHARACTERISTICS**

When converting Traveller characters to HERO, use the following:

HERO Cha	Traveller Cha
STR	= STR * 1.5
DEX	= DEX * 1.5
CON	= END * 1.5
BODY	=
INT	= INT * 1.5
EGO	= choose
PRE	= choose
COM	= choose
PD	= Figured
ED	= Figured
SPD	= Figured, rounded up
REC	= Figured
END	= Figured
STUN	= Figured

Two characteristics in Traveller don't convert to HERO: EDU and SS. EDU (Education) is how well educated, or high-tech, the character's training is. One method of "translation" is to add 3 to the EDU, and that's the TL the character was trained in; that means a character with an EDU of 7 was trained in a TL10 army or society. Another way to "translate" it is to allow the EDU to be the number of bonus Background skills the character may take after translation of the other skills. Of course, the GM may simply ignore the characteristic completely.

For SS (Social Standing), anything above 10 should be treated as the *Perk Fringe Benefit: Nobility*, with appropriate costs.

CONVERTING SKILLS

When converting Traveller leveled skills, such as Carbine-2 or Administration-3, the first level is the skill itself, and additional skill levels are pluses. So Carbine-2 becomes WF: Carbines and +1 with Carbines; Administration-3 becomes Bureaucrats +2.

Psionics and The Psionic Institute

Psionics — the powers of the mind. Psionics in Traveller® is not completely understood, at least in the Imperium. The Imperium fears what it does not understand, and does not tolerate psionic usage. On the other hand, the Zhodani openly practice psionics and look down on those who don't.

The psionics in Traveller have evolved since the original *Classic Traveller*, and the information presented here is an amalgamation of the four main sources: *Classic Traveller*, *MegaTraveller*, *Traveller: The New Era*, and *T4*.

Psionics Institute

The term "Psionics Institute" refers to any underground organization devoted to the illegal training of individuals in the use of psionic talents – illegal with the Imperium, at least. Each institute is independently organized and maintained by the members of a particular world. Psionics institutes existed in one form or another prior to space travel, but became popular during the Long Night, when reproducible scientific discoveries made psionics a teachable, learnable science.

At first, psionics institutes were rare, forming only on a few scattered worlds that either had an unusually high rate of psionic talents appearing or that encouraged psionics for social, political, or commercial reasons. In the years after the Civil War, psionic institutes were sprung up on many high-population worlds within the Imperium.

After some scandals in the Psionic Institutes, public opinion changed from favor to prejudice against them. A period known as the PsionicsSuppressions ensued. During the PsionicsSuppressions, the institutes' charters were revoked, and talented individuals were persecuted. In some cases, the individuals fled to assume new identities on other worlds; in others, whole families emigrated to the Zhodani Consulate or elsewhere beyond the frontiers of the Imperium.

The Imperium has tried to eradicate the institutes for the last 200 years.

Psionics

The Psionic Institute rates psionics on a 0 to 11 scale; R-0 is no psionic talent, R-11 is highly talented. Ratings higher than 12 cannot be attained naturally, but can be achieved with Psi-drugs. The maximum possible rating is 15.

Psionics are powered by an Endurance Reserve, which has a maximum END of Rating * 5, and a maximum REC of Rating per 20 minutes. Examples are shown below for an R-2, R-4, and R-10 psionic.

Rating	END Reserve	Cost
2	10 END, 2 REC per 20 minutes	2
4	20 END, 4 REC per 20 minutes	4
10	50 END, 10 REC per 20 minutes	9

We present here two methods the GM may use for psionics in TravellerHERO: the Traveller Conversion Method (straight conversion) and the General Method (loose conversion). Which method to use is up to the GM.

TRAVELLER CONVERSION METHOD

Using the Traveller Conversion Method, each group of psionic talents has specific powers and power levels to be learned, and they must be learned in order. There are also standard limitations that apply to replicate the assumptions in Traveller.

Traveller psionic powers are *Invisible Power Effect (Source only; +1/2 OR Fully; +1)*, *Line Of Sight (+1/2)*, and *Indirect (any origin, any direction; +3/4)*. However, they have *Range-based Endurance Cost (+x END Cost per 5*10^x meters; -1/4)***, and cost more power to activate than they do to maintain - *Increased Activation Cost (2x END to Activate, x1 END per 1 Minute to Maintain Constant Power; +0)*.

Powers in the Telepathy, Telephysics, Teleportation, and perhaps Other groups should be purchased in a Multipower or Elemental Control framework. Powers in the self group are primarily talents, and do not require a framework. Because Traveller Conversion requires that specific powers must be learned in a specific order, a Variable Power Pool is not recommended.

GENERAL METHOD

Using the General Method, the character should buy an Elemental Control or Multipower, with a list of allowed powers. Each power effect may typically have up to Rating*5 active points.

The general method assumes more variability is allowed in the customization of powers, allowing psionics to have greater talent in some areas than in others. The GM should still require outward powers (Telekinesis, Change Environment, etc.) to be *Invisible Power Effect (Source only; +1/2 OR Fully; +1)*, *Line Of Sight (+1/2)*, and *Indirect (any origin, any direction; +3/4)*. However the GM may, if he wishes, disregard the *Range-based Endurance Cost* and *Increased Activation Cost* limitations.

** For the math-challenged, count the number of zeroes after the 5, and that's the additional END cost.

0 - 5	+0
6 - 50	+1
51 - 500	+2
501 - 5000	+3

TELEPATHY GROUP

Telepathy is the talent of sending and receiving thoughts, detecting other minds, and influencing or damaging them.

In addition to the basic powers, all telepaths also learn Mental Shield, which is 2 points of Mental Defense per R level (thus a R-10 spends 20 points on Mental Defense).

TRAVELLER CONVERSION METHOD

The powers and their order are: *Detect Minds* as an R-1; *Telempathy* and *Telempathic Projection* as an R-2; *Send and Receive Thoughts* as an R-4; *Probe* as an R-8; and *Mental Assault* as an R-10. The powers of an R-10

Telepath are shown below.

GENERAL METHOD.

Using the General Method, the character should buy an Elemental Control with the following effects. Each effect may have up to rating*5 active points.

- Mind Scan, 1d6/rating.
- Telepathy, 1d6/rating.
- Mind Control, 1d6/rating.
- Ego Attack, 1d6/2 ratings.

The GM may if so desired require the *Range-based Endurance Cost* and *Increased Activation Cost* limitations to keep the Traveller feel. The GM should NOT allow the powers to have the *Reduced END (0 END)* advantage.

If the GM wishes to open up the list, he may optionally allow *Mind Link* outside the Elemental Control, and *Mental Illusion* and *Ego-Based Mental Transforms* in the Elemental Control as well.

Here's an example of an R-2 Telepath using the General Method.

CLAIRVOYANCE GROUP

Clairvoyance is the talent of extending the senses to other locations. Though not allowed in Traveller, the full definition of Clairvoyance includes sensing

the past (retroognition), future (precognition), or even other dimensions (spirits in the astral realm, alternate futures, etc.).

TRAVELLER CONVERSION METHOD

The Clairvoyance powers and their learned order are: *Sense* as an R-2; *Clairvoyance* and *Clairaudience* each as an R-5; and *Combined Clairvoyance and Clairaudience* as an R-9. The powers of an R-10 Clairvoyant are shown below.

9	<i>Psionic End Reserve</i> : Endurance Reserve (50 END, 10 REC) Reserve: (15 Active Points); REC: (10 Active Points); Slow Recovery 1 Hour (-2)	
71	R-10 Total	

GENERAL METHOD

Using the General Method, the character should just buy:

Clairvoyance: Clairsentience (Sight Group), Increased Activation Cost (x2 END to Activate, x1 END per 1 Minute to Maintain Constant Power; +0). Total Cost: 20 points.

This version of the power is considered an R-4. The GM may allow the character to add the *Vague and Unclear (-1/2)* limitation to if the player wishes to make it an R-2.

The GM may optionally require the *Range-Based Endurance Cost* limitation.

The GM can allow the character to add Hearing Sense, Smell/Taste Sense, or x2 range (multiple times), but every +5 points in the power is a +1 to the R-rating, and the maximum power is an R-11. GMs should disallow reducing the END cost to zero.

If the GM wishes to open up the list, he may *option-*

ally allow Precognition and Retrocognition, but this is not recommended unless the *Vague and Unclear* limitation is also applied to prevent problems with mysteries.

The GM could also allow Mental-group *Detects* to represent Psychometry and Aura Vision, which are also related to Clairvoyance.

TELEPHYSICS GROUP

Telephysics is the power to move matter, which can include not only normal objects (chairs, pencils, etc.) but also molecules and atoms - generating heat by increasing the velocity of atoms and molecules, generating cold by reducing their velocity.

TRAVELLER CONVERSION METHOD

The closest translation for Telekinesis is 1 point of Telekinetic STR per R rating; an R-3 has 3 STR TK, an R-10 has 10 STR TK, etc.

The source of the telekinesis cannot be sensed, and the power can reach anywhere in range the telekinetic can see. Characters who are strictly Telekinetic (as per *Classic Traveller*) should buy the Telekinetic power as below.

R-3 Telekinetic		
Cost	Powers	END
12	<i>R-3 Telekinetics</i> : Telekinesis (3 STR), Increased Activation Cost (x2 END to Activate, x1 END per 1 Minute to Maintain Constant Power; +0), Line Of Sight (+1/2), Indirect (Any origin, any direction; +3/4), Invisible Power Effects (Fully Invisible; +1) (15 Active Points); Range-Based Endurance Cost (+x END Cost per 5*10^x meters; -1/4)	3

The GM should use this method for Traveller Conversion and for General Methods. An R-10 Telekinetic may use telekinesis to levitate, at the same rate they can lift an object of the same weight.

One other alternative is to allow a Variable Power Pool for the special effect "telephysics". This would allow Drains (running) for icy area, RKA Area Effects for fiery furnace areas, etc. All powers would have to take the IPE and Indirect advantages, and Continuous powers would have to take the Delayed Endurance Cost advantage.

TELEPORTATION GROUP

Teleportation allows instantaneous movement from one point to another, regardless of intervening objects or barriers. Teleportation is subject to relative velocity, conservation of momentum, and potential energy changes.

TRAVELLER CONVERSION METHOD

R-2 Teleporter		
Cost	Powers	END
22	<i>R-2 Teleportation</i> : Multipower, 22-point reserve

Characters should also buy one or more Floating Fixed Locations.

GENERAL METHOD

Psionics with the Teleportation talent should buy Rating * 5 Active Points in teleportation skill, with the following mandatory limitation: Side Effects (1d6 EB for every multiple of 500 meters up or down after the first 500 meters; -1/2)

SELF GROUP

Psionics with the Self talent should buy the following talents and superskills, depending on current ranking.

TRAVELLER CONVERSION METHOD

Using the Traveller Conversion method, the powers and the order are: Feign Death (Simulate Death) at R-2; Orientation (Bump of Direction) at R-3; Enhanced

Strength at R-4; Enhanced Constitution at R-5; and Regeneration at R-9.

Feign Death (R-2) is the HERO Talent Simulate Death. At R-2, the character has the base 3-point skill. Each +1 in Rank allows a +1 to be purchased, so that at R-6 the character could have Simulate Death +4.

Orientation (R-3) is the HERO Talent Bump of Direction. There are no bonuses for a ranking above R-3.

Enhanced Strength (R-4) is a 1d6 Aid to STR per R-ranking above 3; an R-4 is 1d6 Aid, an R-8 is 5d6 Aid. It is Self-Only, and lasts 1 hour before fading, and requires END from the psionic End Reserve to initiate.

(1d6 Aid per rating, lasts 1 hour, self only)

Enhanced Constitution (R-5) is a 1d6 Aid to Constitution per R-ranking above 4; an R-5 is 1d6 Aid, an R-8 is 4d6 Aid. It is Self-Only, and lasts 1 hour before fading, and requires END from the psionic End Reserve to initiate.

(1d6 Aid per rating, lasts 1 hour, self only).

Regeneration (R-9) allows self-healing of BODY damage at the rate of 1 BODY per minute. It is not on all the time, but requires END from the psionic END Reserve to initiate it.

GENERAL METHOD

With the General Method, the GM should allow the character to buy other Self-aware talents such as Absolute Time Sense, Combat Sense, Lightning Calculator, and Eidetic Memory.

OTHER GROUP

Psionics with talents in the Other category are GMs prerogative, but rare. Some of these examples are converted from T4, and include:

Psionic Technology

Psi Shields: Mental defenses can be added to armor; see the armor rules.

Psi Drugs: several are known. Effects are fairly similar, and are not cumulative.

Psi Booster (TL 12; Cr 1,250, 12.5 grams, per dose) Increases all psionic abilities. 5d6 aid, all psionic abilities (including END; +2 END/point), fade 5/5 hours; takes 1 hour to take effect.

Psi Double is two doses of Psi Booster.

Psi Special (TL 14; Cr 2,500, 25 grams, per dose) As psi booster, but twice as strong; psi strength increases at only 5 active points per hour. Has dangerous side effects; make an EGO roll or permanently lose 10 END off your END reserve. The standard dose is two doses.

Psionic Skills: An Alternative

An alternative method of handling psionics is to make Psionics into a skill-based system. Under this system, psionic abilities cost 1 point for an 8- familiarity, or 3 points for an EGO-Based Skill Roll, + 1/2 points. To use this system, the character must purchase the following:

A Talent for each ranking in a particular psionic branch, costing 3 points per R-Level. For example *Telepath-R4* is 12 points, *Clairvoyant-R3* is 9 points, *Telekinetic-R10* is 30 points. Characters must pay points to increase the rank to get more powerful versions of their psionic powers. The ranking represents the raw power available.

A Power Skill for each branch of psionics the character possesses. For example Telepath Power Skill, Clairvoyant Power Skill, or Telekinetic Power Skill. The skill costs 3 points for an EGO-Based roll, and represents the general understanding the character has with that class of psionics. It can also be used for parlor tricks of that type of psionics. Each +1 to the power skill costs 2 points.

A Psionic Endurance Reserve. All Traveller/ TravellerHERO psionics (except for some of the Other class of psionics) are powered by an Endurance Reserve, with 5x the R-value of a character's psionics. If a character is an R-2 Telekinetic and an R-4 Telepath, he should buy a psionic endurance reserve for an R-4.

The Psionic Powers, as defined and permitted by the GM. The GM may use the existing converted Traveller psionics, as well as create his own. When creating additional psionic abilities, keep in mind whether the power increases by Ranking (e.g. Telepathy R-2 versus Telepathy R-5) or not (Orientation in Other).

For example, Josiah is an R-4 Telepath, and buys Detect Minds, Telepathy, and Telepathic Project at full skill (3 skills, total 9 points) and Send/Receive Thoughts as a Familiarity (8-, 1 point) for a total of 10 points.)

If Josiah has an EGO of 13, his Psionics cost and skill rolls would be as follows:

Skill-Based Telepath R-4		
Cost	Powers	END
12	Talent: R-4 Telepath	
7	Telepath Psionic Skill +2 (14-)	
4	Psionic Endurance Reserve (20 END, 4 REC/20 min)	
3	Detect Minds, 12-	3
3	Telepathy, 12-	4
3	Telepathic Projection, 12-	4
1	Send and Receive Thoughts, 8-	5
8	Mind Shield: Mental Defense (10 points total)	
Total Cost: 41 points		

The downside with this version is that all powers require a successful [psionic branch] Power Skill Roll to work, and there's more onus on the Referee in creat-

ing and developing Psionic powers. The upside is that skills are 3 points each, so characters can learn more psionics as the Referee permits.

Weapons

This chapter is devoted to the variety of personal and military weapons available in the Imperium.

Small Arms

Small Arms (a.k.a. Slugthrowers) are the most common firearm in TravellerHERO. At the standard Traveller TL12 campaign, nothing else beats slugthrowers for damage **and** portability.

Most of the weapon listings and descriptions for slugthrowers assume firing a standard bullet. To add other bullets, such as AP, AET, DumDum, and many others, see the excellent information in *Dark Champions* pages 200-256.

Handguns

BODY PISTOL

Effect: RKA 1d6

Shots: 6

Combat Modifiers: +1 OCV, -1 RMod

STR Minimum: 7

Range: 100"

Mass: 300 g

CR: 500

Ammo Cost: 20CR/magazine

Description: The body pistol is a non-metallic, semi-automatic pistol. It is designed to avoid detection by metal detectors, and is notable as a weapon of assassins and hijackers. The body pistol fires a 5-gram slug at 500-600 mps, and has a 6-cartridge magazine.

Body Pistol: (Total: 20 Active Cost, 7 Real Cost) Killing Attack - Ranged 1d6 (15 Active Points); STR Minimum 6 (STR Min. Cannot Add/Subtract Damage; -1), IAF (-1/2), 6 Charges (-1/2), Side Effects (-1 vs. Range Modifier), Side Effect occurs automatically whenever Power is used (-1/2), Real Weapon (-1/4), Beam (-1/4) (Real Cost: 4) **plus** +1 OCV with Ranged Combat (5 Active Points); IAF (-1/2) (Real Cost: 3)

AUTO PISTOL, 9MM

Effect: RKA 1d6+1

Shots: 15

Combat Modifiers: +1 OCV, -1 RMod

STR Minimum: 7

Range: 100"

Mass: 1 kg

CR: 200

Ammo Cost: 10CR/magazine

Description: The Auto pistol fires a standard 9mm slug.

9mm Auto Pistol: Killing Attack - Ranged 1d6+1, 15 Charges (+0) (20 Active Points); STR Minimum 7 (STR Min. Cannot

Add/Subtract Damage; -1), OAF (-1), Real Weapon (-1/4), Beam (-1/4)

AUTO PISTOL, 9MM MAGNUM

Effect: RKA 1 1/2d6

Shots: 15

Combat Modifiers: +1 OCV

STR Minimum: 7

Range: 125"

Mass: 1 kg

CR: 400

Ammo Cost: 10CR/magazine

Description: The standard metallic semi-automatic pistol. It fires a 9mm 10gram Magnum slug at 400-500 mps, and has a 15-cartridge magazine.

Auto Pistol: Killing Attack - Ranged 1 1/2d6, 15 Charges (+0) (25 Active Points); STR Minimum 7 (STR Min. Cannot Add/Subtract Damage; -1), OAF (-1), Real Weapon (-1/4), Beam (-1/4) **plus** +1 with Ranged Combat (5 Active Points); OAF (Pistol; -1). Total Cost: 9 points

REVOLVER, 9MM

Effect: RKA 1d6+1

Shots: 6

Combat Modifiers: None

STR Minimum: 7

Range: 100"

Mass: 1 kg

CR: 150

Ammo Cost: 10Cr/6 shots

Description: The old-fashioned revolver, it fires a 9mm standard revolver slug and holds 6 bullets.

9mm Revolver: Killing Attack - Ranged 1d6+1 (20 Active Points); STR Minimum 7 (STR Min. Cannot Add/Subtract Damage; -1), OAF (-1), 6 Charges (-3/4), Real Weapon (-1/4), Beam (-1/4)

REVOLVER, 9MM MAGNUM

Effect: RKA 1 1/2d6

Shots: 6

Combat Modifiers: None

STR Minimum: 10

Range: 125"

Mass: 1 kg

CR: 300

Ammo Cost: 20Cr/6 shots

Description: The old-fashioned revolver equivalent to a .357 Magnum, it fires a 9mm Magnum slug and holds 6 bullets. Revolver ammunition is not interchangeable with other slugthrowers.

9mm Magnum Revolver: Killing Attack - Ranged 1 1/2d6 (25 Active Points); STR Minimum 10 (STR Min. Cannot Add/Subtract Damage; -1), OAF (-1), 6 Charges (-3/4), Real Weapon (-1/4), Beam (-1/4)

Thrown Grenades

The grenades produced for the Imperial Armed forces are limited to those shown below. A case of 20 grenades weighs 1 kg, and costs 200Cr.

FRAGMENTATION GRENADE

Fragmentation grenades fragment on exploding, sending out razor-sharp shrapnel in the explosion, usually with lethal results.

Fragmentation Grenade: Killing Attack - Ranged 2d6+1, Explosion (+1/2) (52 Active Points); 1 Charge (-2), OAF (-1), Real Weapon (-1/4), Beam (-1/4), Range Based On Strength (-1/4)

CONCUSSION GRENADE

Concussion grenades produce a large explosive force capable of knocking people over or throwing them a short distance (<1") as well as stunning or damaging them.

Concussion Grenade: Energy Blast 7d6, Explosion (+1/2) (52 Active Points); 1 Charge (-2), OAF (-1), Beam (-1/4), Real Weapon (-1/4), Range Based On Strength (-1/4)

SMOKE GRENADE

Smoke grenades send out a cloud of grayish-white smoke, and are often used to mask entry/exit during sieges.

Defenses

Imperium technology offers two kinds of personal protection: body armor and battle dress.

Body Armor

Body armor consists of a jumpsuit, often worn underneath normal clothing. The jumpsuit can be made of any of a variety of possible materials, and is commercially available for civilian and military use.

1. Activation 14-, or Locations 7-15.
 2. Must be tailored into a body suit, such as Jack, Mesh, or Cloth
 3. Worn with a body suit, it is Ablative versus Laser fire
 4. No Mass
 5. Vest
 6. Half Mass
 7. Hardened
 8. Full body: Loc 6-18.

All personal armor has the Real Armor (-1/4) limitation, and Half Mass or No Mass, as indicated.

Personal Armor has good resistance to physical attacks (knives, guns, etc.) but little resistance to energy attacks (lasers). Those who can afford it often have Reflec added to their personal armor for just this reason.

Battle Dress

Battledress is a fully enclosed suit, and is strictly military use only. A suit may very rarely be found on the black market, but such items are extremely expensive - on the order of 200,000Cr +.

COMBAT ARMOR-10

Combat Armor-10 is an armored Vacc Suit composed of various polymers and alloys. Mass: 36#/16kg. Cost: 1500Cr.

Cost: 15000 Cr

Mass: 1.0 kg

Handheld Densitometer-14: Detect A Single Thing 14- (Unusual Group), 1 Continuing Charge lasting 1 Day (+0) (6 Active Points); OIF Bulky Fragile (-1 1/4), Custom Modifier (cannot be used in an artificial gravity field; -1/2), Custom Modifier (Scan penetration of 1 Meter; -1/2), Concentration (1/2 DCV; -1/4), Custom Modifier (produces an audible hum when in operation; -1/4) [Notes: Using an object or areas natural gravitational attraction, the remote densitometer can easily classify an objects density]

PASSIVE RADIATION IMAGING SYSTEM BINOCULARS-12

Cost: 25000 Cr

Mass: 0.50 kg

Passive Radiation Imaging System Binoculars-12: Detect A Large Class Of Things 14- (Unusual Group), 1 Continuing Charge lasting 1 Day (+0), Variable Special Effects (Any SFX; any type of radiation from IR to Gamma; +1/2) (19 Active Points); OAF Expendable (Easy to obtain new Focus; -1)

PORTABLE BIO-SNIFFER-13

Cost: 500000 Cr

Mass: 1.0 kg

Portable Bio-Sniffer-13: Detect A Large Class Of Things 14- (Unusual Group), Discriminatory, Analyze, 1 Continuing Charge lasting 1 Day (+0) (23 Active Points); OIF Bulky Fragile (-1 1/4), Concentration (1/2 DCV; -1/4) [Notes: Scans for evidence of biological/metabolic activity in the area]

PORTABLE NEURAL ACTIVITY SENSOR-13

Cost: 15000 Cr

Mass: 1.0 kg

Portable Neural Activity Sensor-13: Detect A Single Thing 14- (Unusual Group), Discriminatory, Analyze, Range, Sense, 1 Continuing Charge lasting 1 Day (+0) (23 Active Points); OIF Bulky Fragile (-1 1/4), Gestures (-1/4), Concentration (1/2 DCV; -1/4) [Notes: the NAS detects the electrical activity of a lifeforms nervous system]

ATMOSPHERE TESTER

Tests for composition and breathability.

BUGS

Near-microscopic monitoring devices.

BUG DETECTORS

Can Detect, Smother, or Destroy bugs.

DETECTOR, STRESS

Detects the Stress level of the target, which may or may not indicate the truthfulness of the target.

RADAR, FIELD SURVEILLANCE

300meter range radar

Other Devices

BLIP ENHANCER

Blip Enhancer: Radio Group and Detect Images 1" radius, +/-4 to PER Rolls (20 Active Points); OIF Immobile (-1 1/2), Custom Modifier (only to increase the size and or shape of the sensor reading; -1), No Range (-1/2) . Total Cost: 5 points

CHAFF DISPENSER

Chaff Dispenser: Radio Group Images Increased Size (2" radius; +1/4), +/-2 to PER Rolls, 12 Continuing Charges lasting 1 Turn each (+1/4) (16 Active Points); OIF Bulky (-1), Dropped (-1/2). Total Cost: 6 points

CHAFF ROCKETS

Chaff Rockets: Radio Group Images Increased Size (4" radius; +1/2), -3 to PER Rolls, 8 Continuing Charges lasting 1 Turn each (+0) (21 Active Points); OIF Bulky (-1), Real Weapon (-1/4). Total Cost: 9 points.

COUNTERBATTERY RADAR

Counterbattery Radar: Radar (Radio Group), +8 to PER Roll, Discriminatory, Analyze, Increased Arc Of Perception (360 Degrees), Tracking, MegaScale (1" = 10 km; +1/2), Can Be Scaled Down (+1/4) (75 Active Points); Custom Modifier (only used to track ballistic weapons and their flight paths; -1), Costs Endurance (-1/2), Requires A Skill Roll (-1/2), Crew-Served (2 people; -1/4). Total Cost: 23 points.

EM MASKING AND STEALTH CONSTRUCTION

EM Masking and Stealth Construction: Change Environment 1" radius, -4 to Radar PER Rolls, -4 to Infrared Perception PER Rolls, Multiple Combat Effects, Reduced Endurance (0 END; +1/2), Persistent (+1/2) (48 Active Points); OIF Immobile (-1 1/2), No Range (-1/2). Total Cost: 16 points

FLARE PODS

Flare Pod: Sight Group and HRRP Images 1" radius, +3 to PER Rolls (22 Active Points); 1 Continuing Charge lasting 1 Turn (-1 1/4), Dropped (-1/2). Total Cost: 8 points

LASER SENSORS

Laser Sensors: Detect A Single Thing 14- (Unusual Group), Sense (8 Active Points); OIF Bulky (-1), Custom Modifier (only lets operator know he's been hit with a laser sensor; -1). Total Cost: 3 points

PIXIE/NIXIE DECOY

Pixie/Nixie Decoy: Hearing Group Images Increased Size (2" radius; +1/4), +/-4 to PER Rolls, 8 Continuing Charges lasting 1 Turn each (+0), MegaScale (1" = 10 km; +1/2) (30 Active Points); Custom Modifier (affects sonar and hydraphones only; -1), Set Effect (mimics signature of launching vehicle; -1), OIF Bulky (-1), Dropped (-1/2) [Notes: sub or ship launched sonar decoy]. Total Cost: 7 points

RADAR WARNING RECEIVER

Radar Warning Receiver: Detect A Single Thing 14- (Unusual Group), Sense (8 Active Points); Custom Modifier (only lets operator know hes been hit with a radar; -1), OIF Bulky (-1). Total Cost: 3 points

RADIO DIRECTION FINDER

Radio Direction Finder: HRRP (Radio Group), +5 to PER Roll, Concealed (-1 with HRRP PER Rolls), Discriminatory, Targeting, Tracking, MegaScale (1" = 10 km; +1/2), Can Be Scaled Down (+1/4) (66 Active Points); Extra Time (1 Turn (Post-Segment 12), -1 1/4), Costs Endurance (-1/2), Requires A Skill Roll (-1/2), Crew-Served (2 people; -1/4). Total Cost: 19 points

SENSOR DECOYS

Sensor Decoys: Radio Group, Nightvision and IR Perception Images 1" radius, +/-3 to PER Rolls, 32 Continuing Charges lasting 1 Turn each (Recovers Under Limited Circumstances; requires base or ammo carrier; +1 1/4) (54 Active Points); OIF Immobile (-1 1/2). Total Cost: 22 points

SHORT RANGE RADAR JAMMER

Short Range Radar Jammer: Suppress 4 1/2d6, Area Of Effect Nonselective (2" Radius; +3/4) (40 Active Points); Visible (-1/4). Total Cost: 32 points

WILD WEASEL DRONE

Wild Weasel Drone: Dispel All Sensors and Commo 10d6, MegaScale (1" = 1,000 km; +1), Can Be Scaled Down (+1/4), all [special effect] powers simultaneously (+2) (127 Active Points); OIF Bulky Fragile (-1 1/4), 4 Charges (-1), Requires A Skill Roll (-1/2), Crew-Served (2 people; -1/4). Total Cost: 32 points

Communications

Personal Devices

LONG RANGE COMMUNICATOR

Cost: 500 CR
Mass: 1.50kg

Long Range Communicator: High Range Radio Perception (Radio Group), MegaScale (1" = 100 km; +3/4), Can Be Scaled Down 1" = 2m (+1/4) (24 Active Points); Limited Power Maximum Range of 500 km (-1), Real Technology (-1/4), IIF (-1/4)

MEDIUM RANGE COMMUNICATOR

Cost: 200 CR
Mass: 0.50kg

Medium Range Communicator: High Range Radio Perception (Radio Group), MegaScale (1" = 10 km; +1/2), Can Be Scaled Down 1" = 2m (+1/4) (21 Active Points); Limited Power Maximum Range of 30 km (-1), Real Technology (-1/4), IIF (-1/4)

SHORT RANGE COMMUNICATOR

Cost: 100 CR
Mass: 0.30kg

Short Range Communicator: Radio Perception/ Transmission (Radio Group), MegaScale (1" = 1 km; +1/4), Can Be Scaled Down 1" = 2m (+1/4) (15 Active Points); Limited Power Maximum Range of 10 km (-1), Real Technology (-1/4), IIF (-1/4)

PORTABLE LASERCOMM RELAY-10

Cost: 2500 Cr
Mass: 1.5 kg

Portable Lasercomm Relay-10: Mind Link , Machine class of minds, Specific Group of Minds, Number of Minds (x, 1 Continuing Charge lasting 1 Day (+0) (25 Active Points); OAF Bulky Fragile (-1 3/4), Only With Others Who Have Mind Link (-1), Custom Modifier (Range effected by atmospheric conditions; -1/4), Visible (-1/4)

COMMUNICATOR, VIDEO

Cost: 1000 Cr
Mass: 0.8 kg
Range: 300 km

Description: Transmits a voice and 2D video signal over a maximum distance of 500km, and small enough to be carried in a pocket or on a belt. It can transmit and receive simultaneously.

Other Devices

Computers

HAND CALCULATOR

Cost:

Mass:

Description:

Hand Calculator: Lightning Calculator (3 Active Points); OAF (-1), Real Technology (-1/4) (250 CR, 0.10kg)

COMPUTER LANGUAGE TRANSLATOR

Cost: 2000 Cr for unit, 150 Cr per language clip

Mass: 0.5 kg

Description: Commonly available on worlds of TL10 or above, CLTs use language clips (memory clips containing 1 language). Each CLT can hold only two clips, and each clip contains only one language.

Each user places one clip for his native language and one clip for the language to be translated in the CLT, and plugs the device into a communicator. The CLT translates the language from native to target, so that communication is possible.

There are over 700 languages available.

BATTLE COMPUTER

Cost:

Mass:

Description: tbd

COMPUTER, HAND

Cost:

Mass:

Description: Provides the services of a super computer, equivalent to a Model 1 in computing power.

Medical Equipment

AUTOMED

Cost: 500,000 Cr

Mass: 6 metric tons

Size: 1.5 hexes long by 1 hex wide

Description: An automed is a single-unit automated care facility that monitors vital signs, makes suggestions as to treatment options, and regularly injects prescribed medicines. It will initiate resuscitation on patients with failing vital signs.

+1 to +3 to Medicine.

SURGICAL INSTRUMENTS

Cost: 1000 Cr

Mass: 5 kg

Description: Instruments for performing surgery.

Surgical Instruments: +1 with SS: Surgery (2); OAF (-1). Total Cost: 1 point.

FIRST AID KIT

Cost: 100 Cr

Mass: 0.2 kg

Description: TBD

MEDICAL SCANNER, POCKET

Cost: 10,500 Cr

Mass: 0.1 kg

TL: 12

Description: The pocket medical scanner is a small device that detects and displays the target's vital signs after a 10-second scan. The pocket scanner must be touched to the target, and has no range.

The pocket medical scanner also has a memory where it can store readings taken at a point in time for later review. It can also be programmed to emit an alarm if the patient's vital signs fall below a programmed level. (For this to work, the pocket medical scanner must remain in physical contact with the patient.)

Medical Scanner (Pocket): (Total: 37 Active Cost, 14 Real Cost) Detect Vital Signs 18- (Radio Group), Discriminatory, Analyze, Requires A System Operations Skill Roll (No Active Point penalty to Skill Roll; +0) (20 Active Points); Extra Time (1 Turn (Post-Segment 12), -1 1/4), OAF (Med Scanner; -1) (Real Cost: 6) **plus** Eidetic Memory, Requires A Systems Operation Skill Roll (No Active Point penalty to Skill Roll; +0) (5 Active Points); OAF (Med Scanner; -1) (Real Cost: 2) **plus** Hearing Group Images 1" radius, Requires A System Operations Skill Roll (No Active Point penalty to Skill Roll; +0), Reduced Endurance (0 END; +1/2), Trigger (Activating the Trigger is an Action that takes no time, Trigger resets automatically, immediately after it activates; Triggered when Vital Signs fall below programmed level; +1) (12 Active Points); OAF (Med Scanner; -1) (Real Cost: 6)

MEDICAL SCANNER, COMPUTER

Cost: 10,500 Cr

Mass: 0.1 kg

TL: 12

Detect Vital Signs plus Computer w/ SS: Medicine, SS: Biology, and program: Diagnose Condition. and database of treatment information.

TL12, 1 kg, 25,000 Cr

MEDICINES

VACCINES

Vaccines provide immunity to a specific disease or group of closely related diseases for a one-year period. Vaccines typically cost 15 Cr. Below is an example of a Cold/Flu vaccine effect and write-ups.

Here's what the target gets:

Cold/Flu Vaccination: Life Support (Immunity: Common Cold/Flu). Cost: 2 points

Here's the vaccine:

Cold/Flu Vaccine, 1 Continuing Charge lasting 1 Year (+0), Usable As Attack (+1) (4 Active Points); OAF (Vaccine Bottle; -1), Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4). Total Cost: 1 point.

ANTIBIOTICS

Dispel vs. specific infections, Cumulative, 1/day. 50Cr/dose.

METABOLICS

Dispel vs. all diseases, Cumulative, 1/day. 1000Cr/dose.

HEALING

MEDICAL SLOW DRUG

Cost: 225 Cr

Mass: 4.5 grams

Description: Medical Slow Drug increases the body's healing power by 30-fold (to 1 BODY per 4 hours), but lasts only 24 hours, so multiple doses are often required over several days. The subject of the slow drug remains unconscious while healing, and there are no side effects.

Medical Slow Drug: Healing 1 BODY, Reduced Endurance (0 END; +1/2), Persistent (+1/2) (20 Active Points); Extra Time (Regeneration-Only) 4 Hours (Character May Take No Other Actions; -2 3/4), Self Only (-1/2), Limited Power One Dose lasts 24 hours (-1/4). Total cost: 4 points.

SMART BANDAGE

Cost: 100 Cr

Mass: 2 grams

Description: A box of 12 bandages with a healing chemical; each bandage can only be used once.

Smart Bandage: Healing BODY 2d6 (20 Active Points); OIF (Smart Bandage; -1/2), 12 Charges (-1/4). Total Cost: 11 points.

ENHANCEMENT DRUGS

Enhancement Drugs are bought as Aid; the maximum effect of any stat-boosting aid is to raise a stat by 50% of its max for up to 5 minutes, or 25% of its max for up to an hour. Drugs are usually Cr 5 and 0.1 grams per active point. Drugs take one minute to take effect if ingested, immediate if injected. Aid may be used to give powers the target does not have. Multiple doses can be taken. Most drugs have side effects, usually 1d6 damage, no defense, per die of aid, when the effect ends. Standard drugs:

COMBAT DRUG

Cost: 60 Cr per dose

Mass: 1.2 grams

Combat Drug: Aid STR 1d6, Delayed Return Rate (points return at the rate of 5 per Minute; +1/4), Trigger (Activating the Trigger requires a Zero Phase Action, Trigger requires a Turn or more to reset; Use Drug; +1/4) (15 Active Points); OAF (Drug; -1), Side Effects, Side Effect occurs automatically whenever Power is used (Drain 1d6 CON, Recovers 5 per minute when Drug wears off; -1/2). Total Cost: 6 points.

FAST DRUG

Cost: 135 Cr per dose

Mass: 2.7 grams

Fast Drug: 1d6 aid to feign death, fade 5/month; Cr 135, 2.7 grams.

SLOW DRUG

Slow Drug: 3d6 SPD aid, max 20, fade 5/minute; Cr 200, 4 grams.

ANAGATHICS

Anagathics: Life Support (Long life)

Survival Gear

ARTIFICIAL GILL

The artificial gill allows breathing in oxygenated water, but only functions on worlds where there is an atmosphere so that the water IS oxygenated.

Cost: 4000 CR

Mass: 4.00kg

Artificial Gill: Life Support (Expanded Breathing (Underwater)) (5 Active Points); OIF (-1/2), Functions only on worlds with atmosphere 4-9. (-1/2)

COLD WEATHER CLOTHING

Cost: 200 CR

Mass: ??

Cold Weather Clothing / Arctic Survival Suit: Life Support (Safe in Intense Cold) (2 Active Points); OIF (-1/2)

FILTER MASK

Cost: 10 CR

Mass: ??

Filter Mask: Life Support (Expanded Breathing (Tainted Atmospheres [4, 7, 9])) (5 Active Points); OIF (-1/2)

FILTER/RESPIRATOR COMBINATION

Cost: 150 CR

Mass: ??

Filter/Respirator Combination: Life Support (Expanded Breathing (Very Thin, Tainted Atmosphere [type 2])) (5 Active Points); OIF (-1/2)

OXYGEN TANKS

Cost: 500 CR

Mass: 5.00 kg

Oxygen Tanks: Life Support (Self-Contained Breathing), 1 Continuing Fuel Charge lasting 6 Hours (+0) (10 Active Points); OIF (-1/2)

PROTECTIVE SUIT

Cost: 700 CR

Mass: 5.00 kg

Protective Suit: Life Support (Safe in Corrosive Atmosphere (type B)) (2 Active Points); OIF (-1/2)

RESPIRATOR

Cost: 100 CR

Mass: ??

Respirator: Life Support (Expanded Breathing (Very thin atmosphere [type 3])) (5 Active Points); OIF (-1/2)

SWIMMING EQUIPMENT

Cost: 200 CR

Mass: ??

Description: Includes swim fins, wet suit, face mask.

Swimming Equipment: Swimming +2" (2"/4" total) (2 Active Points); OIF (-1/2)

UNDERWATER AIR TANKS

Cost: 800 CR

Mass: 5.00 kg

Underwater Air Tanks: Life Support (Self-Contained Breathing), 1 Continuing Fuel Charge lasting 6 Hours (+0) (10 Active Points); OIF (-1/2), Only for use underwater (-1/2)

VACC SUIT (TL 7)

Cost: 10,000 CR

Mass: 10.00 kg

Vacc Suit (TL 7): (Total: 31 Active Cost, 22 Real Cost) Life Support (Safe in Intense Cold; Safe in Low Pressure/Vacuum) (4 Active Points); OIF (-1/2), Real Technology (-1/4) (Real **Cost:** 2) **plus** Life Support (Self-Contained Breathing), 1 Continuing Fuel Charge lasting 6 Hours (+0) (10 Active Points); OIF (-1/2), Real Technology (-1/4) (Real **Cost:** 6) **plus** Radio Perception/Transmission (Radio Group), MegaScale (1" = 10 km; +1/2), Can Be Scaled Down 1" = 1km (+1/4) (17 Active Points); Real Technology (-1/4) (Real **Cost:** 14)

DIVING GEL SUIT-9

Cost: 5000 CR

Mass: 10 kg

Description: TL-9 Skintight Diving Suit with separate bubble helmet
Diving Gel Suit-9: LS (Eating: Character only has to eat once per week; Safe in High Pressure; Safe in Intense Cold; Self-Contained Breathing) (14 Active Points); OIF (-1/2), Custom Modifier (Capable of 100 meters depth safely at 1G; -1/2)

PLSS[A]-9

Cost: 3000 CR

Mass: 10 kg

Description: Short Duration Portable Life Support System. Provides power and oxygen for vacc suits.
PLSS[A]-9: LS (Safe in Intense Cold; Self-Contained Breathing), 4 Continuing Charges lasting 1 Hour each (+0) (12 Active Points); OIF Bulky (-1), Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4), OIHID (-1/4), Custom Modifier (Real Equipment; -1/4)

PLSS[B]-9

Cost: 5000CR

Mass: 10 kg

Description: Medium Duration Portable Life Support System. Provides power and oxygen for vacc suits.
PLSS[B]-9: LS (Safe in Intense Cold; Self-Contained Breathing), 1 Continuing Charge lasting 1 Day (+0) (12 Active Points); OIF Bulky (-1), Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4), OIHID (-1/4), Custom Modifier (Real Equipment; -1/4)

PLSS[C]-9

Cost: 8000 CR**Mass:** 10 kg**Description:** Long Duration PLSS with Integrated thruster package

PLSS[C]-9: (Total: 52 Active Cost, 14 Real Cost) LS (Safe in Intense Cold; Self-Contained Breathing), 2 Continuing Charges lasting 1 Day each (+0) (12 Active Points); Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4), OIHID (-1/4), Custom Modifier (Real Equipment; -1/4) (Real **Cost:** 5) plus Flight 20" (40 Active Points); 1 Continuing Charge lasting 1 Minute (-1), OIF Bulky (-1), Only In Straight Lines (-1/2), Requires A Skill Roll (-1/2), OIHID (-1/4), Custom Modifier (Real Equipment; -1/4) (Real **Cost:** 9)

GENERAL PURPOSE VACC SUIT-8

Cost: x CR**Mass:** 10 kg**Description:** Requires a PLSS to provide power and oxygen

General Purpose Vacc Suit-8: (Total: 23 Active Cost, 7 Real Cost) Armor (5 PD/5 ED) (15 Active Points); OIF Bulky (-1), Normal Mass (-1), Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4), Real Armor (-1/4) (Real **Cost:** 4) plus LS (Safe in High Radiation; Safe in Intense Cold; Safe in Intense Heat; Safe in Low Pressure/Vacuum) (8 Active Points); OIF Bulky (-1), Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4) (Real **Cost:** 3)

TAILORED VACC SUIT-14

Cost: x CR**Mass:** 10 kg**Description:** Requires a PLSS to provide power and oxygen, unsealed protects to +50C or -10C

Tailored Vacc Suit-14: (Total: 29 Active Cost, 9 Real Cost) Armor (7 PD/7 ED) (21 Active Points); OIF Bulky (-1), Normal Mass (-1), Real Armor (-1/4), Extra Time (Delayed Phase, Only to Activate, -1/4) (Real **Cost:** 6) plus LS (Safe in High Radiation; Safe in Intense Cold; Safe in Intense Heat; Safe in Low Pressure/Vacuum) (8 Active Points); OIF Bulky (-1), Extra Time (Delayed Phase, Only to Activate, -1/4) (Real **Cost:** 3)

LIGHT DUTY VACC SUIT-10

Cost: x CR**Mass:** 10 kg**Description:** Requires a PLSS to provide power and oxygen

Light Duty Vacc Suit-10: (Total: 14 Active Cost, 6 Real Cost) Armor (2 PD/2 ED) (6 Active Points); OIF Bulky (-1), Extra Time (Delayed Phase, Only to Activate, -1/4) (Real **Cost:** 3) plus LS (Safe in High Radiation; Safe in Intense Cold; Safe in Intense Heat; Safe in Low Pressure/Vacuum) (8 Active Points); OIF Bulky (-1), Extra Time (Delayed Phase, Only to Activate, -1/4) (Real **Cost:** 3)

HOSTILE ENVIRONMENT VACC SUIT-12

Cost: x CR**Mass:** 10 kg**Description:** Requires a PLSS to provide power and oxygen

Hostile Environment Vacc Suit-12: (Total: 32 Active Cost, 11 Real Cost) Armor (8 PD/8 ED) (24 Active Points); OIF Bulky (-1), Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4), Real Armor (-1/4) (Real **Cost:** plus LS (Safe in High Radiation; Safe in Intense Cold; Safe in Intense Heat; Safe in Low Pressure/Vacuum) (8 Active Points); OIF Bulky (-1), Extra Time (1 Turn (Post-Segment 12), Only to Activate, -3/4) (Real **Cost:** 3)

Traveller Starship Tech

Imperial starships in the Traveller universe are different from starships in Terran Empire or Star Trek.

Average Tech Level

The average Imperial Tech Level is 12, with a high of 15. Most Imperial worlds can sustain TL 12.

Weapons Systems

Anti Matter Missiles are advanced tech +2, standard nukes are uncommon, however detonation laser nuclear warheads see common use in space combat.

Plasma/Fusion Weapons

In Traveller Plasma and Fusion weapons have a considerable range advantage over those in Hero, and the turret weapons have a higher rate of fire.

FTL Commo

doesn't exist at all, even for theoretical applications

Screens and Forcefields

nothing on a personal level until very advanced tech levels, Ships and vehicles are limited to nuclear dampers and meson screens, and late TL-15 Black Globe Generators

AI

Very Limited AI until TL-15, then true AI becomes feasible

Tractor Beams and similar Things

very limited usage til TL-15, they become available as defensive bay weapons called repulsors at TL-13

Teleportation/Matter Transport

Advanced Tech, experimentation starting at Late TL-15, very short range and extremely bulky with a high power requirement even at high tech levels

Buying Starships

Ships without Jump Drives costs x. Ships with Jump Drives cost x.

Size and Displacement

Traveller hulls are measured in Displacement Tons (DT). The table below converts Traveller hulls by Displacement Tons into HERO Size.

Hull Size: [DT]	Size	STR	BODY	DCV	Base Cost
1	5	35	15	-3	
2	7	45	17	-4

1000000	35	185	45	-22

This assumes the standard hardened steel hull (DEF 8).

The standard ship hull is a hardened steel hull, DEF 8. Selecting a different hull material affects the BODY, DEF, Credit cost, and may have other side effects.

Material	BODY	DEF	Hull Cost	Notes
Titanium alloy	+1	+1		
Light Composite	+2	+1		
Composite Laminate	+2	+2		
Crystal Iron	+5%	+3		1
Superdense	+10%	+4		1
Bonded Superdense	+20%	+8		1

Biomechanical	+0	+0	x2	2
Planetoid	+10	+10	x 1/2	3
Buffered Planetoid	+15	+15	x 2/3	3

- May add Thermal Superconducting Armor (TSA)
- Regenerates 1 BODY/hour
- Cannot Enter Atmosphere

Selecting the hull shape also affects the BODY, Cost, and whether the ship can be streamlined to enter atmospheres.

Hull Type	BODY	DEF	Cost	Notes
Dispersed/Open	+4	+0	x.75	1
Needle	+3	+0	x2	2, 3(+2)
Wedge	+2	+0	x1.5	2, 3(+2)
Cylinder	+1	+0	x1.25	2, 3(+1)
Box	+1	+0	x1	2
Sphere	+0	+0	x1	2
Dome/Disk	+2	+0	x1.25	2, 3(+1)
Closed Structure	+2	+0	x1.25	1
Slab	+2	+0	x1.5	2, 3(+1)

- Cannot Enter Atmosphere
- Can Enter Atmosphere
- Highly maneuverable, adds to Piloting Skill Roll

Finally, the amount of DEF varies between short-range and long-range vessels, and between civilian and military vessels.

Starship Armor Systems				
TL	Armor System	DEF	A/R Cost	Price

Power Systems

The table below summarizes the power systems commonly available for starships in the Traveller universe. Cold Fusion is the standard for starship power; there is no antimatter power system.

TravellerHERO Power Systems						
Power Plant	Year	TL	END	REC	A/R Cost	Price
Cold Fusion	TBD	TBD	250	25	TBD	TBD

As a general guideline, a fusion power plant takes up x hexes (TBD).

Propulsion Systems

Traveller ships use two kinds of propulsion: Maneuver Drives for space maneuvering, and Jump Drives for interstellar travel.

TravellerHERO Propulsion

JUMP DRIVES

Jump drives are a type of Displacement Drive (see *Terran Empire, page160*). The jump travels through Hyperspace from the Jump Point to the Target Point, and all jumps take 1 week (7 days). Jump drives are the only FTL drives in Traveller.

Weapon Systems

Traveller ships generally use Lasers and Sandcasters?

Starship Lasers

Starship lasers are the most common starship weapon in the Traveller universe. Lasers can be mounted in turrets, mounted as spinal weapons, etc.

Lasers come in 3 power levels: Low Tech (TL9), Medium Tech (TL12, Imperial Standard), and High Tech (TL15).

TL9 Turret Lasers

TL9 Lasers are an RKA 8d6 visible light laser.

BEAM LASER, 250 MW SINGLE-TURRET

Effect: RKA 8d6

Sensors

Sensors in Traveller do not use a VPP, as the sensor systems are fixed and configurable on the fly.

Meson communications becomes available at TL15.

Sensor Packages

Traveller sensor packages are divided into active and passive sets.

The Active Arrays can have a range of anywhere from 3,000 to 480,000 kilometers

And consists of a variety of active and passive sensor emitters, making it a much more sophisticated

Version of Radar.[Radar, Lidar, Sonar]

Passive sensor arrays, use large antennae to detect any electromagnetic emanations from a potential target.

These are extremely sophisticated and precise

sensors.[High Res Thermal, Densitometers, and Neural Activity Sensors are all passive.

TYPE A2 FAR TRADER

The Type A2 Far Trader is a TL11 commercial starship, built using a standard 200-ton displacement hull. The A2 is a common sight throughout Imperial space, designed as a small, compact merchant vessel.

Standard crew is 6 personnel (1 Command, 1 Engineering, 2 Gunnery, 1 Medical, and 1 Steward). The standard model has 8 large staterooms and 10 cold-sleep births. It has a 51-ton cargo hold, and carries one 4-ton displacement Air/Raft in an internal compartment.

It's purchase value new is MCr82.8.

1. Orbital Zones: Primary Star: 3 (Bodies Orbit around Primary Star)
 Binary Star: Close (Binary Star Orbit Around Primary Star)
 Tertiary Star: 4 (Tertiary Star Orbit around Primary Star)

SIZE RELATED DETAILS

1. Basic World Type: Planet
 2a. Planet Diameter: 3,300 miles (5,280 km)
 2b. Planet Density: Molten Core, 0.9 terra
 5. World Mass: 0.048 terra
 6. World Gravity: 0.338 terra
 7. Planet Orbit Period:
 7a. Stellar Mass: 0.8 sol 1.11 sol 1.11 sol
 7b. Orbital Distance: 1.0 AU
 7c. Orbital Period: 346.68 standard days
 9. Rotation Period: 34.11 standard hours
 10. Axial Tilt: 15 degrees
 11. Orbital Eccentricity: 0.15
 12. Seismic Stress Factor: 0.0

ATMOSPHERIC RELATED DETAILS

1. Atmospheric Composition: Standard oxygen-nitrogen mix, with pollutants taint
 2. Surface Atmospheric Pressure: 1.3 atm
 3. Surface Temperature:
 3a. Stellar Luminosity: 1.089
 3b. Orbit Factor: 374.025

Scenarios

Plague of Perruques

A Traveller Hero scenario for 4-8 players. Copyright 1985 and used with the permission of Marc Miller.

NOTES

Originally published in 1985, and first used as a tournament scenario for the Frontier Wars convention, its copyright 1985 by GDW, but no specific author is listed. This is used with the permission of Marc Miller.

THE CHARACTERS

The characters can come from any background, there will need to be one noble whether as a PC or NPC, and at least one person with some kind of hunting/ field-craft skills. The characters will not need access to a ship for this adventure.

THE SITUATION

The Hostilities of the Fifth Frontier War are only recently concluded. The Regina subsector is now recovering from the ravages of the war, many worlds were battlefields, while others were cut off by blockades, sieges, and enemy raiders. With recovery comes a reopening of the subsector.

The adventurers have been recruited by Genidiirsi Hault-Reitan as part of an informal team visiting worlds in the subsector. Baron Reitan's purpose is two-fold: He has been visiting his own holdings on various worlds between Regina and Efate, and helping in the recovery by managing problems that have come up.

The entire group set out from Regina some months ago. Baron Reitan arranged passage for everyone along the spinward main as far as Efate. Stopovers at each world have averaged about a month.

Uakaye: The Group has just arrived on Uakaye, The Baron has planned a short stay, primarily to allow a hunting expedition for Redbacked Slonths, a carnivore native to Uakaye.

THE HUNTING EXPEDITION

Baron Reitan has contacted a local outfitter, gotten some maps, a few guidebooks, and an aerial survey.

Redbacked Slonths are in season, now migrating to the north shore of Triante, Uakaye's largest island, this territory is mostly forest. Hunting Slonths is a test of locating their spore and following it until the slonth is found.

Slonths leave a vile-smelling spore trail exuded from a gland in their tails, which frightens the smaller animals that are slonth prey.

REFEREE SYNOPSIS

This adventure is in two parts, an initial hunt for the Redbacked Slonth, and then an investigation into

the cause of a plague that is ravaging Uakaye. The hunt is brief and simply allows the players to learn to work together, the real adventure is the search to diagnose and treat the plague.

Referee Notes: The original version of this had six different causes, the tournament version only used the first cause

CAUSES:

1. A genetic experiment gone wrong
2. A genetic experiment deliberately released for revenge
3. A genetic experiment deliberately released for ransom
4. Zhodani biological weapon
5. A naturally occurring plague
6. A plague from another world

THE HUNT

Redbacked Slonths are an interesting carnivore native to Uakaye. They are 200kg pouncers with claws.

The Barons hunt for them is a pleasant diversion which he's been looking forward to for several months

The skin of the redback slonth is a delicate velvety hide which makes an exotic leather. The Baron wants that leather to make a cape.

Note: For Hero System, use the stats for an adult tiger (Bestiary 147-148), but remove the roar and add +2 to the Climbing skill.

RANDOM EVENTS

A 3d6 Die roll of 10+ indicates an event; if the Plague Cause is #5, then each event should present a grey colored grazer (grey should be emphasized, these are animals suffering from the plague). A second or later encounter should present an animal dead from the plague.

THE PLAGUE

Upon return from the hunting expedition, the group finds the situation has changed considerably since they left Uakaye City. A fast-acting disease has swept the city, affecting nearly 30% of the population, and medical and government officials are overworked and overwhelmed. They are fully occupied just trying to relieve suffering among the afflicted.

Symptoms: The plague's most visible symptom is a perruque, a cap of fungal fibers that cover the top of the head like a wig. The grey fibers completely cover the victims own hair, obscuring the natural hair color.

The other symptoms are more serious. A high fever, a thin opaque film over the eyes, creating blindness. Unconsciousness and coma, and death from brain damage in some cases. The progress of the disease is swift, the first sign is a mild fever along with bits of grey fiber at the roots of the hair, within a day. The fibers completely cover the skull within 3 days, and the vision has dimmed due to the film over the eyes, and the fever increases in intensity. By the eighth day the victim is

completely blind and racked by a high fever. A Crisis occurs on the 7th day, if the fever breaks the victim usually recovers, the film over the eyes melts off, and the grey fibers shed with normal hair loss, recovered patients are bald until their hair grows back in. Recovery is complete within 10 days of onset. The Crisis on the 7th day is crucial, if the patient doesn't survive the crisis, the condition rapidly deteriorates and death follows within 24 hours, about 50% of the plague victims don't survive.

Treatment: Early in the course of the disease there is little that can be done. When the fever starts to rise, the victim must be kept comfortable and fever suppressants administered, Anti-biotics can help reduce complications but they don't appear to help in preventing the disease itself.

ADVENTURE INFORMATION

TIME

The local day is close enough to 24 hours to count as a standard day for scenario purposes, and the day is divided into 4 6-hour blocks. All characters need one block of time to sleep under normal circumstances.

Travel times in Uakaye City can be considered as irrelevant, travel to other locations will be listed by location.

INFORMATION GATHERING

At each major map location, it is possible to encounter a rumor. The rumor may be true, false, or misleading, or even a potential clue when the group first arrives at the map location. The Rumor should be presented at the first reasonable opportunity.

LINRADIS ISLAND: THE IGS ENGINEERING LABORATORY

Travel time: [6 hours from the city by grav vehicle]

Imperial Geneering Systems maintains a remote genetic engineering laboratory on the remote island of Linradis. The Isolation is deliberate and serves 2 purposes, It helps reduce contamination in case of an accident, and it keeps workers minds on their work and away from the distractions in the city.

Intel Kiriolion is a researcher at the lab, and he is available to discuss the plague and its effects on Uakaye City. His superior Resian Talbot is the director of the laboratory but has only been on the job a short time.

Rumor: One of the labs staffers comments that former director Tanissa Levant was discharged for inefficiency.

CASES:

1. Kiriolion has been working on a biological agent similar in effect to the plague currently in Uakaye City. Unfortunately his lab has no remaining samples, all were sent along with a final report by courier to the Naval base at Efate about 2 weeks ago. The courier Lars Intron took the materials

into the city and then was going to take 2 weeks vacation in the city, he has not returned, and he is just now overdue.

Kiriolion has an electron microscopic profile of the plague, if it matches with a sample from Uakaye City, then they are the same.

IGS has a tentative vaccine for the plague, which should work on about 60% of the population, if the 2 plagues match, then the vaccine should stop the spread of the disease.

POLAR SUBSURFACE CITY

Travel time: [12 hours from city]

An especially rich vein of Iridium Ore runs along the floor of the ocean of Uakaye near the north pole. To exploit it, a mining settlement has been established under a dome on the floor of the sea. The settlement is controlled and owned by Ling Standard Products. Its designation is MinCon 78.

A platform raised 50 meters above the ocean surface allows vehicles to land and be lowered to the city by elevator. The city is as yet untouched by the plague. The local city leaders are aware of the plague and are determined to avoid its reaching the colony

They will allow the adventurers to interact by video with whomever they need to talk to. The information they can provide includes the following.

They have had no contact with the IGS research lab on Linradis, if the infection came from there, the lack of contact is the reason the colony remains untouched.

Rumor: Their search radars record a ship landing in the Shallows recently.

THE SHALLOWS

A section of the sea on Uakaye north of Uakaye City is exceptionally shallow, between 1 and 3 meters deep with a floor of solid bedrock. A starship has recently crashed here after successfully entering atmosphere. The wreck lies half submerged in the center of the shallows. The ship named the O'Shaunessy is a 400 ton subsidized merchant which visits Boughene, Uakaye, Roup, and Knorbes and Feri on a regular basis. This ship has 2 decks, the lower deck is flooded and underwater, the upper deck has about 30cm of water sloshing about, and the damage to control circuits and electronics is severe.

Rumor: The Ships computer contains a record of the ships flight.

Cases:

1. The ship crashed due to the failure of a control interface, the entire crew of 5 was killed during the landing.
- 2-5: nothing useful
6. The entire crew is dead. Examination of the bodies shows that all of them died from the effects of the plague. The ships log contains an account by the

captain of the gradual effects of the plague on the crew, while enroute to Boughene. The ships log can be accessed by another ships computer at the starport.

2. Trying to land the pilot made a miscalculation and crashed in the shallows. Records on the ships bridge show the plague is also rampant on Boughene.

AG FACTORY

The Ag Factory is an automated production center which is devoted to growing a variety of grains and vegetables for local consumption. The entire operation is run by less than 5 people in an extremely complex control center.

Rumor: One of the staff at the factory comments in passing that the Ag Factory is producing large quantities of food, but casualties from the plague have reduced demand. No one is going to earn their bonuses this year.

Cases:

1. The night controller has cooked up a plan to make some money from this plague. He has sent a ransom demand to the police department. The ransom demands are untraceably sent by computer, they call for the ransom to be placed in a drone at the Ag Factory and send it west over the ocean. The Ag Factory has both the money and the drone on hand, Somebody at the factory will have to prepare it. The police will expect the drone to be intercepted by an air raft or perhaps a radio signal. In either case there's a good chance the extortionist will get away with the money. Actually the night controller expects to switch a false load for the money when it is placed in the drone, he will then hide the money and get away with it later. The group when visiting the Ag factory will find everyone friendly and open, but unable to provide any real information. The night controller has no real knowledge of the source or cause of the plague.

STAGING POINT

Travel time: [6 hours from the city]

Staging point was established as a stopover for travelers ranging across the surface of Uakaye. The small station has a restaurant, a vehicle repair station, a communications beacon, and a small store.

The station is operated by a husband and wife couple and their three children, questioning them can give a good idea of who has passed through recently and of any interesting events.

Rumor: The Zhodani casualty remains recovery team was through here several weeks ago. The people here think that the Zhodani were responsible for the plague.

Cases:

1. The weekly courier between IGS and Uakaye City

hasn't been through on his regular run. In fact he hasn't been back from Uakaye City, They think he came down with the plague, his name is Lars Intron.

HUNTING GROUNDS

The forests of Uakaye are home to the Redbacked Slonoth, the Baron's goal on his hunt. Terrain types on the hunt are Forest, Swamp, and Beach.

Cases:

1. The hunting grounds show no important information, no evidence of the plague is present in the field.
5. If the hunting grounds are revisited, throw 2D each time an encounter table is to be consulted, on a 7+ a local animal is found dead of the plague.

CITY INDUSTRIAL PARK

The industrial park is the site of several small factories, most sprang up to deal with war production needs of the Imperium, and now they're winding down as their contracts expire. Consequently there are only a few workers here and the future looks bleak. One temporary bright spot is Triple V vacc suit corporation, They have been hiring workers lately to help produce stripped down vacc suits for local sale, the suits serve as quarantine suits to protect against catching the plague.

Rumor: Some unemployed workers are saying that Triple V is run by a truly unfeeling and greedy person who devised the plague just to sell a surplus stock of vacc suits and make a quick credit.

Cases:

1. A new employee of the company is Tanissa Levant, he is in charge of quality control, and has only been on the job for a few weeks.

In response to direct questions: Tanissa Levant admits that he was formerly head of the IGS lab, he left because his contract ran out. He also says that he knew about a similar plague being developed by IGS, but he is certain that the Uakaye plague can't be same one. He always insisted on extreme safety measures while he was director.

RESIDENCES

The residential area of the city is filled with houses and apartment blocks, because of plague fears, no one is allowing visitors or callers.

UAKAYE DOWN STARPORT

The starport closed itself to traffic once the nature of the plague became apparent. There has been no traffic allowed to the planetary surface.

Rumor: There was a strange incident recently: A ship landed out in the shallows, rather than here at the starport. One fellow believes that it was Zhodani Saboteurs, another thinks it was smugglers.

Cases:

1. There is no record of a parcel shipment passing through the starport from IGS to Efafe, The clerk knows Lars Intron, and expected him with the package but hes never shown up, that was just before the plague started he thinks.

STARTOWN

The people in startown are especially troubled by the plague. With the starport closed there is little in the way of new business. And the old hands are running out of money, the only jobs to be had are clearing the dead out of rooms – a job likely to give the plague to the workers.

Cases:

1. Cleaning up the plague dead is one of the few jobs open at the moment. Some people won't take the job for fear of catching the plague, but others take the job because they need the money. One Startown resident says he has always done this sort of job, when a hotel needs a body removed, they call him [They paid 100 cr per job before the plague, now the job has gone down to 50 cr per job]. He remembers just before the plague started, he and another man cleaned out a room in the Uakaye Regent Hotel, of a man who had been dead for a few days, his partner died of the plague. The man thinks about it for a minute and then comments that his partner was one of the first to catch the plague.

POLICE HEADQUARTERS

The police are overwhelmed by the plague, several of their enforcers have fallen to its effects, they are overworked and undermanned. The Police Chief appears distracted [perhaps showing the signs of the plague himself]. The police chief is unable to provide any help due to lack of resources, He suggests there might be some equipment available at the Imperial Army Base.

Rumor: An enforcer going off duty is heard to say that he thinks this is a Zhodani plot, they use biological agents.

Cases:

1. The police chief says he has received a ransom note that calls for cr 1,000,000 in return for the formula for an antidote and vaccine, they are checking on its authenticity, he should know more in a few more days.

NEXT TIME THE PARTY CALLS: The ransom note appears to be authentic, they are going to pay the ransom.

COMMERCIAL CENTER

The stores of Uakaye City are located in the commercial center of the city. Equipment of Law level 8 or less and tech level D or less can be purchased in the stores here, prices are 10% above base price, Vacc suits and protective suits are priced at 200% of base price. A Lo-

cally produced protective suit is available for cr 1,000.

ABANDONED ARMY BASE

[6 hours from the city]

The Imperial Army Base has been scheduled for in-activation, there are no troops assigned to it now, only a few guards responsible for the equipment left behind. The Officer of the guard can provide an Imperial G Carrier for use as transportation on Uakaye, This requires a good reaction from the officer, or he will not cooperate, there are over 300 g carriers parked in the motor pool, one could be stolen if necessary.

IF ASKED: a cooperative officer of the guard could provide bio-protection suits which may protect against the plague.

RUMOR: Two of the guards can be overheard talking about the plague, the wear Imperial bio-protection suits when they have to go into town.

HOTEL COMPLEX

The Uakaye Regent Hotel is one of several hotels in Uakaye City, since the plague it is the only one remaining open, One of the others was burned to the ground in an attempt to clear out plague contamination.

RUMOR: There was a Zhodani group through the city some weeks ago, recovering remains of Zhodani war casualties. They were the ones responsible for the plague, either they left it behind or they tripped a booby trap while recovering bodies.

Cases:

1. If a clerk is asked about Lars Intron[It must mention him by name] he can check the files and find that Intron was registered there and found dead of the plague in his room. The room itself was cleaned up and Intron's luggage was placed in storage. Introns luggage contains a parcel addressed "The chemical warfare section Imperial Naval Base, Efafe". The package contains a ruptured sample container of the biological agent, it has leaked out.

MEDICAL CENTER

The Medical Center in Uakaye City is under tremendous pressure, treating plague victims, looking for a cure, looking for treatments until a cure is found. The staff is very cooperative, and appreciates the efforts of the group to find the reason that the plague has hit Uakaye.

RUMOR: The medical staff was originally puzzled by the rapid appearance of the plague, they now have several theories. It could be a genetically manipulated virus, or it could be a naturally occurring disease,

Cases:

1. The first victim of the plague was Lars Intron, He was found in a hotel in the city, he has not yet been identified by occupation or residence.

FINAL NOTES

For the assorted critters in the wilderness, use various creatures from the Fantasy Hero bestiary, as Traveller just uses generic critters. There are buffalo, boars, crocodiles, small elephants, or at least local equivalents of such.

One plot line that's not covered but could easily be more developed is the Zhodani leaving a "gift".

The original module didn't include a map, and the characters were from a module called Tarsus.

¶

Starport Situations**The Tourist**

Tourists, being unfamiliar with a given area, can make trouble or provide information.

BASIC ENCOUNTER

The characters are travelling through the starport when they see a man or woman who is obviously a tourist on the corner ahead of them. He or she is wearing normal travel clothing, armed as the local law level allows, and carrying maps or travel brochures. As the characters approach the corner, he or she approaches and hails them in Galanglic, asking to buy them a cup of coffee (or local equivalent) and talk for a while. The tourist claims to be a traveller from a nearby human world, and is ready to head back home as soon as his ship arrives. Unfortunately, the starport area seems none too safe, and he/she would like some company in the meantime.

The characters are not in a hurry to a particular place, and the time of day makes the drink and relaxation sound good. If the characters accept, the tourist happily buys each a drink (as well as one for himself), and probes the characters about their backgrounds, adventures, and so on. If asked, he gives the name Kristoff (or Krista if female).

VARIATION ONE

The tourist really is a tourist. The tourist is a noble from a nearby human world, who left to travel the subsector and get a better understanding of the local economies and how they affected the tourist's world. The tourist is now bound for home, with ideas to try to make things better.

VARIATION TWO

If the characters are friendly, and show themselves trustworthy, the tourist may ask a favor. The tourist is heading back home, and has received word of trouble back home, and would like the characters to accompany him/her back home (he'll pay their way). If the characters accompany the tourist home, they find that the tourist's holdings have been taken over by a pathologic relative. The tourist's family and friends are prisoners, and with the character's help the tourist can regain his family and holdings.

VARIATION THREE

The tourist is really a con-man and thief, and is sizing up the characters. He is an expert pickpocket, and will attempt to pickpocket one or more of the characters as they are leaving the coffeehouse. If they discover him doing this, he will claim it's a mistake and attempt to flee at first opportunity.

VARIATION FOUR

The tourist is really a spy; possibilities include working for rebels if the area has harsh rulers, for a rival government if the world is balkanized, for the local government if it's a restrictive government. If the characters seem like they are up to no good, the spy will take an interest in their activities, either to report them or to convince them to help him. If the characters seem on the up-and-up, the spy will try to get them to help him against "the enemy", whoever that may be.

The Loaders**BASIC ENCOUNTER**

A large hovertruck loaded with goods is travelling along the starport roadway to one of the merchant ships, and there are 1-3 men in the hovertruck. They are in a hurry, and showing no signs of getting out of the character's way. In fact, the characters will have to leap out of the way to avoid injury, but doing so means landing in a dirty area - mud, oil, scummy water, or other such materials.

VARIATION ONE

The crew of the hovertruck are in a hurry - the captain of the ship they are travelling to is in a hurry, and told their company that he wants the goods loaded by time x, or not at all. Their company told them if they don't get the goods loaded, they'll lose their job.

VARIATION TWO

The 'crew' of the hovertruck are actually thieves, who have stolen the hovertruck and its goods before it got to the ship that bought the goods. The thieves are on their way to store and sell the goods on the black market.

VARIATION THREE

The crew of the hovertruck have been promised a day off with pay if they get the goods loaded on time, and they are determined to earn that day off.

VARIATION FOUR

The crew of the hovertruck are actually law enforcement agents, on their way to a bust (in disguise) or to help an officer in distress. They will not appreciate any delays.

The Police**BASIC ENCOUNTER**

As the characters are travelling in the Starport, they are approached by 1-4 police officers. The police tell the characters they are investigating a crime in the area (theft, mugging, murder, larceny, etc.) and would like to ask the characters some questions.

VARIATION ONE

The police have no interest in the characters, but are asking everyone they encounter to identify the person in a photograph (either a criminal or the dead victim). If the characters later see that person, the characters may act on that information as they see fit.

VARIATION TWO

The police have no interest in the characters, but are looking for anyone who may have witnessed the crime and can help with any clues. If the referee wants the characters to have been witnesses, he should set up the situation appropriately.

VARIATION THREE

The police are interested in the characters, because one of them looks like a criminal they are hunting. The character(s) will be detained and taken to the police station, and asked questions. It will take 1d6-1 days to clear up the matter.

VARIATION FOUR

The police are interested in the characters, because one or more of the characters has been framed for a crime (theft, murder, etc.). The police will attempt to detain them and take them down to the station for questioning and arraignment. Those characters remaining free (or out on bail) will have to find out who the real guilty party is to clear their name.

Military On Leave**BASIC ENCOUNTER**

Members of one of the military organizations (Army, Navy, or Marines) are on leave at the starport, and have been drinking and having a good time. They are wearing identifying clothing and insignia, and appropriate sidearms (pistols, gauss pistols, lasers, etc.). They are approaching the area where the characters are, but have not yet made contact.

VARIATION ONE

The members of the military group are from the same organization as one of the characters is/was (Army, Navy, or Marines), and the military group recognizes the character by insignia or other clues, and are treated like long-lost brothers. The military group insists on buying drink for the character(s) at the nearest bar. While at the bar, chances are high that the characters will encounter a rival group, and insults will fly. If a barfight breaks out, the military group will fight alongside the characters. Or the military group will encounter a rival group, a fight will break out, and the characters will have to fight alongside their new friends.

VARIATION TWO

One of the members of the military group thinks that

one of characters is a friend reported missing in action, and insists on buying the character some drinks and learning what happened. The referee may use this as desired, especially if the character's history may make this true.

VARIATION THREE

The military group notice that one or more of the group are from a rival organization, and begin insulting them. They are perfectly willing to get into a brawl.

VARIATION FOUR

The military group mistakes one of the characters for someone who cheated him, stole his girl, or some other event that makes it personal. He will insult the character(s), and depending on the character's response, likely start a brawl. The characters could end up in jail if they're not careful.

Mugging

BASIC ENCOUNTER

The characters hears moans and cries from a darkened or hidden area - an alley, a vacant lot, a warehouse area - and find the apparent victim of a mugging.

VARIATION ONE

The mugging victim is barely conscious, but is grateful for any help the characters provide(d). The victim may or may not require hospitalization or further care, and the reasons for the mugging may make this possible or not for the victim.

VARIATION TWO

The mugging victim dies as the characters arrive, with the muggers fleeing the scene. The police may arrive too late to suspect any but the characters, and the referee should take the situation from there based on the character's actions (and possible reputation).

VARIATION THREE

The mugging victim is in shock, and thinks the characters are more attackers. The victim's physical state will dictate whether the victim can try to fight back at his supposed attackers, flee, or just shouts for help. As the police arrive, the referee determines the situation based on the character's actions (and possible reputation).

VARIATION FOUR

The mugging is a setup for the real mugging - an attempt on the characters. There should be one attacker for every character in the party. Weapons are typically limited to clubs and knives, but the referee should adjust based on the characters weapons and defenses and the law level of the current world.

Sample Characters

Here are some sample characters.

Classic Traveller Merchants

These converted characters are based on characters from one of the Traveller modules (though I won't say which one - if you have the module, you'll probably know it). The HERO System conversions of the characters are built on 100 base plus up to 50 points in Disadvantages, and uses the profession templates from the Professions chapter as well as converting their existing skills and stats.
