**1000-Pound SFW (Sensor-Fused Weapon):** This US weapon is cluster weapon containing 10 submunitions. Each submunition contains a further 4 Skeet smart top-attack munitions, each with an explosively formed penetrators, similar to the SADARM howitzer round. These projectiles are released over the burst area on parachutes, each seeking the nearest target via an infrared sensor. When they sense a target, they fire as if a Tac Missile with a hit roll of 13. If no targets are sensed, the munitions descend to the ground and explode. Weight: 420 kg; Price: \$6500 (R/-)
