How to use these tables

These tables are meant to be used in place of the Fumble table, DCC rulebook pg. 80, and the Critical Hits tables, DCC rulebook pg. 82-86, when dealing with Firearms, Grenades, and Alien weaponry.

To best use the tables in this book you will need to reference the Firearms and Grenade rules in *Crawling Under a Broken Moon* issues 1 & 2.

Summary of Common Damage Effects

Battle Rage: A PC overcome by battle rage may temporarily expend points of his Personality or Intelligence score to enhance the damage on his critical hit. For every ability point he expends, he adds +1d12 to his damage roll.

Ability scores lost in this way return as the PC heals. Each day thereafter where he does not succumb to battle rage,

he recovers 1 point of the affected ability score. This rate is doubled if the character rests.

Bleeding Out: Loses an additional 1d3-1 hp per round for the duration of the effect. Magical healing will cure this condition.

Blinded: Suffers a -4 penalty to attack rolls and may only move at half speed.

Burning: A character who catches fire suffers 1d6 damage per round. He can put out the fire by spending an entire round doing "stop, drop, and roll," which grants him an opportunity to make a DC 10 Reflex save to put out the fire.

Dazed: -2 to all rolls for the duration of the effect.

Drowning: Drowning creatures take 1d6 points of Stamina damage per round and die when Stamina reaches 0; lost Stamina is restored in 1d6 turns after they can breath normally.

Entangled: Cannot move and suffers -2 to attacks and -2 to AC.

Stunned: Can move at half speed but can perform no other actions.
