

NUMBER 41

"AD ASTRA"

JANUARY 1994

# Terra Traveller TIMES

# ⊕ FORWARD OBSERVER ⊕

AN EDITORIAL BY MARK "GEO" GELINAS

## WHAT'S NEW

As you can tell, this issue of the **TIMES** is late, very, very late. I offer no excuses. Much has transpired since the last issue. I am now in Washington State. The needs of the Navy have mandated another change of location. Consequently, the **TIMES** new address is:

Terra Traveller **TIMES**  
 Box 6088  
 Silverdale, WA 98315-6088  
 (206) 698-4979  
 GEnie: MGelinas

One of the good things about the area is there are a number of gamers out here. I have gotten a Traveller campaign started that has been running weekly since June. I haven't been able to do this since I was back in Virginia Beach. There are also a number of Traveller shakers and movers in Washington and Western Canada whom I hope to meet in person once I get settled in.

Kate has joined me here in Washington, now. Our daughter Sarah turned one in July. We believe she will be quite the gamer when she gets older. She enjoys throwing Kate's two inch dice.

Of course the big event of the summer is the release of **TRAVELLER: THE NEW ERA**. Reports are that it is selling well. Most of my players like it a lot and have purchased their own copy. We are eagerly waiting **FIRE, FUSION, AND STEEL**. Good sales means great support. GDW has a number of TNE products planned for the next year. **BRILLIANT LANCES** is already out, and **RAFM** is making starship miniatures for it. But this is only the beginning of new products.

As promised, with this issue, the **TIMES** will be covering **TRAVELLER** exclusively. We hope you like what you see.

Yours for Traveller,

Geo

## QUICK REVIEWS

### RATING SYSTEM

- ✓ - Poor quality or of little use.
- ✓✓ - Fair quality or of some use.
- ✓✓✓ - Average quality or of average use.
- ✓✓✓✓ - Above average quality or of above average use.
- ✓✓✓✓✓ - Excellent quality or very useful.

### SURVIVAL MARGIN

Dave Nilsen		\$10.00	
Players Use	✓✓✓	Referee Use	✓✓✓✓
Artwork	✓✓✓	Content	✓✓✓
Overall	✓✓✓1/2		

A supplement for and introduction to **TRAVELLER THE NEW ERA**. This book compiles most TAS entries from the Rebellion and notes from Strehphon, Norris, and Dulinor. The back has essays on Virus and includes a section for converting **TRAVELLER** and/or **MEGA TRAVELLER** characters to TNE. This is a good book for those who want to get a feel for the Rebellion, and learn the causes and effects of the Collapse.

### TRAVELLER THE NEW ERA

Nilsen and Chadwick		\$25.00	
Players Use	✓✓✓	Referee Use	✓✓✓✓
Artwork	✓✓✓	Content	✓✓✓✓
Overall	✓✓✓✓		

The newest edition of the longest standing science fiction role playing games. This edition upgrades **TRAVELLER's** rules to the GDW "House" system. It also advances the timeline of Traveller to some 70 years into the future. There is a new era of adventure awaiting Traveller characters.

### BRILLIANT LANCES

Nilsen and Chadwick		\$30.00	
Players Use	✓✓✓	Referee Use	✓✓✓
Artwork	✓✓✓✓	Content	✓✓✓
Overall	✓✓✓1/2		

This boxed set is the Traveller starship combat rules. The starship combat rules are contained in the basic game, and can be played as is. However, this set expands on those rules, and provides rules for use with starship miniatures. Furthermore, there is a set of starship design rules in this game. For those who want the design rules, but don't want to buy a boxed set, you

## BEEFING UP CONVERTED CHARACTERS

I have noticed that some characters, when converted to TRAVELLER: THE NEW ERA (TNE) fall a little short when compared to characters created by that system. This is particularly true of characters which were created using the term system before MEGATRAVELLER. There are ways of bringing any converted character up to TNE standards.

Just a reminder, here, this is NOT an approved system, and should be used only by referee approval, and with his guidance.

By my reckoning, the average character in TNE gets 7 skills per term for the first 6 terms and 3 per term after that. That is not to say that TNE characters get 7 skills each term, some get more and some get less. This number is intended as a benchmark for comparing converted characters. I base this generalization on a single career and one secondary skill per term. The term skills here refers to the total of skills and skill levels.

TERMS	TERM SKLS	SCDY ACT SKL	PROM SKL	SPEC DUTY SKILLS	MIN	AVE	MAX
					----	SKILLS----	
0	8	(Background Only)			8	8	8
1	8	1	1/2	2	17	19	22
2	4	1	1/2	2	22	26	32
3	3	1	1/2	1	26	32	39
4	2	1	1/2	1/2	29	36	45
5	1	1	1/2	1/2	31	39	49
6	1	1	1/2	1/2	33	42	53

Minimum Skills are based on Term Skills and Secondary Activity Skill only.

Average Skills are based on Terms Skills, Secondary Activity Skills, and a 50% success rate on Promotion and Special Duty.

Maximum Skills are based on Term Skills, Secondary Activity Skills, and a 100% success rate on Promotion and Special Duty. This is included for reference only. Do not penalize converted characters if by some fluke they happen to end up with more skills than listed here.

If the character starts with a term of education, subtract 4 from his EDU and add that number of skills to the totals above.

If the character changes careers, then subtract that term's skill awards from 7 and add that to the totals above.

All this should give you an idea of what the average TNE character should have, and can serve as a basis for comparison of converted characters.

So, as a referee, you have decided that your player's converted character could use a little help. Where do you select skills from?

First off, you should not let the player add skill points to skills that he already has

-except- in the case of a Classic skill which has been split up in TNE. For example, a character has a Classic skill of Pilot at a level 3. In TNE he could divide this between Astrogation and Pilot(Interface/Grav). So, here, you might be justified in allowing some levels to be added to Astrogation and Pilot(I/G) -but- not so many to increase either of them above a level of 6 (the original level of 3 x 2).

You should encourage the player to take advantage of the many skills that are now available that were not before, thus giving the character a bit of personality and depth.

When selecting new skills, you might consider starting with background skills. Since this area is a new concept to Traveller Characters, converted characters will probably not have them. So look at the list and select up to four skills at level 2 each. Again, this will help add personality to the character.

Next, compare the character's list of skills with those which TNE character receive in the first term of the same or comparable career. They represent the standard training for a new employee in that career. Very likely, you will find some skills in that list which the converted character does not have.

The next area to consider is that of secondary activities. Again, this is a new concept to Traveller characters, and gives the player some latitude to select from that large variety of skills. Check the information for the associated careers and see if it awards none, one, or two secondary activities per term. Remember, unless otherwise specified, each term rewards one secondary activity skill. From this total, you can allow the player to select that many "free" skills.

If the character being converted was originally created under the MT system, then it is possible he had some "special assignments". If so, you might allow the player to select -some- skills from the ones listed under Special Duty.

If that is not enough to round the character out, then look at the skill lists under subsequent terms.

As always, you as referee should use your judgment and control. This article is intended to give some suggestions for filling out a converted character. It is not intended to allow a player to build a super character. Also, watch out for high attributes, the player may have used some of his skill awards to build them up. High attributes can often offset low skill levels.

Yours for Traveller,

Geo

Harlequin Subsector: In 1117, Harlequin had a population of over 148 billion. Its highest population was 90 billion, on Aosta. Its highest tech level was 15(F), at Cashurzid, Aosta, Arkiirkii, Huy Braseal, Karpaty, Rann, and Irashnar. About this time, most of the subsector is in the possession of the Solomani.

Notes

TPPG indicates Travel Zone, Population Multiplier, Planetoid Belts, and Gas Giants. If the Travel Zone digit is empty, it is a green zone, "A" and "R" indicate Amber and Red zones respectively.

Al is the Allegiance column: Li = Lucan's Imperium; So = Solomani Confederation.

Harlequin Subsector: Harlequin subsector has a New Era population of just over 15.49 billion, a decline of over 132.6 billion from its pre-collapse population. Its highest population is 6 billion, from its pre-collapse population. Its highest tech level is 11(B), at Gashurzid. No worlds in Harlequin have experienced a population increase over their pre-collapse levels. Gashurzid has a remarkably high tech level for a the wilds.

**Notes**

TPPG indicates Travel Zone, Population Multiplier, Planetoid Belts, and Gas Giants. Because there is no longer a Travellers' Aid Society or other such watchdog group, there are no travel zones in the Wilds. However, a "B" in the Travel Zone column indicates that the world is Balkanized and the government shown is the largest on the world.

AI is the Allegiance column: The "Na" code indicates a non-aligned world. Such a world may exist within an interstellar community, but have no ties to it, or may be non-aligned because it has virtually no off-world contact. The "--" indicator means that a world has no allegiance because it has no population.

**CONCORD**

**XI MENFS**

**BANASDAN**

## TRAVELLER THE NEW ERA CORRECTIONS and ADDITIONS

Provided by Game Designers' Workshop

Page 38 - Stellar Regions DMs Table - Under "Wilds," wear value reference should be 10, not 8.

Page 186 4 World Size - Should be 2D6-2 5 Atmosphere - Should be 2D6-7 + World Size 6 Hydrographics Should be 2D-7 + World Size 8 Government Should be 2D-7 + Population 9 Law Level Should be 2D-7 + Government

Page 187 - 12 Trade Classification - Atmosphere for Industrial class should be "2-, 4, 7, 9"

Page 196 - Travel Movement Table - Some of the Travel Moves are off. The correct values should be:

Heavy cargo truck	85/10	Ground car	260/50
Hovercraft	240/195	Tracked ATU	150/65
Range truck	240/85	Wheeled ATU	175/65
Air raft (open)	1440/260		
G-Carrier	2880/260		
Enclosed air raft	2880/260		
Grav tank	2400/345	Speeder	3360/390
Grav Bike	720/85		

Page 236 - 5 Sourceworld Trade Classifications - Atmosphere for Industrial class should be "2-, 4, 7, 9"

Page 288 - Upon further testing, we have decided that the following wound effects provide more entertaining and dynamic play, and suggest that all players use these instead.

**Serious Wounds:** the roll to avoid losing consciousness every turn in which the character attempts an activity becomes a Difficult roll against Constitution. Characters who have lost consciousness make a Formidable roll against their Constitution each turn to attempt to regain consciousness.

**Critical Wounds:** The roll to regain consciousness is made each combat turn, and is a D100 (percentile) roll against the Constitution attribute.

Page 289 - Add the following new rule for the use of the personal medical kit, immediately before the "Stabilizing Critical Wounds" section.

Use of a personal medical kit (page 334) allows a character with neither Medical skill nor a doctor's medical kit to avoid the unskilled penalty when attempting a first aid task (thus it is a Formidable task using the character's EDU attribute). One such use uses up the medical kit.

Page 292 - Under Powerboats, the reference to "size one" should read "Micro or SubMicro."

Page 301 - Fire: The task to extinguish a fire should be Difficult versus CON, not Formidable.

Page 302 - In the example of the collision between the car and truck, the following corrections should be made: "the car is hit with a value of (95x2) 10, or 19," "which means that (19-1=) 18 is referenced," and "As a result, (9-1=) 8 points are taken to the Vehicle Damage Results Table." In the tandem bicycle example, the check versus Agility should be Average, not Difficult.

Page 315 - In the second-to-last paragraph, delete the reference to the limit on maximum simultaneous sensor locks.

Page 325 - Delete Hit Location table in lower left-hand corner of page, as it is redundant. Use Ship Facing tables at upper right for hit location.

On Ship Facing/Beam Weapon Fire table, "Fore Quarter" line should read: "reroll results of 16 through 20."

Page 340 - Communication Equipment - The in-text range of 500 km for both the Communicator, Laser, and Communicator, Video, should be changed to 300 km, and all references to the term "regional range" should be deleted.

Page 348 - Laser Turret Table the TL 14 150 Mj laser turret should have an Extreme range listing of "16:1/10-30."

Page 351 - Slug Rifles and Carbines - The double-barrel rifle mentioned in the note is 12mm, not 13, and its magazine listing in the table should be 2i.

Page 355 - Lasers

The Laser Rifle-9 (8cm) should have a Pen of Nil/3-Nil.

The Laser Rifle-13 (4cm) should have a Pen of 3. This Penetration does not attenuate with distance.

**High Energy Weapons** - The numbers listed under "Pen" are the weapons' Penetration Values for use against vehicles, see page 297. The penetration ratings for use against personnel according to the rules on page 285 were inadvertently omitted. These ratings are 1-2-10 for all plasma guns and 1/2-1-4 for all fusion guns.

Correct range for Fusion Rifle-14 is 50, and Fusion Rifle-15 is 70.

Pages 360-365 - Vehicle Data - Many of the vehicles have no listed configuration or an incomplete configuration. In addition, Travel Moves and grav vehicle Combat Moves need to be corrected. Their correct configurations and Moves are as follows. The notation Unarmored refers to the Unarmored Vehicles rule on page 301, and the references to turrets refer to the Hit Location rule on page 297. Any Travel or Combat moves that are not listed do not need correction.

Note that travel moves for ground vehicles assume that the vehicle is moving at a rate of 1.5 times its safe speed for a period of four hours. This means that a ground vehicle could go farther than this during a four-hour period. The absolute upper limit is twice the listed travel move, which translates to the vehicle's driver making constant Formidable driving rolls for a period of four hours.

Travel moves for aircraft and grav vehicles are in the format high flight speed/NOE speed. For NOE speed, the Travel Move is 1.5 times the safe speed for four hours, just as for ground vehicles. Because high flight speed is an absolute speed at high altitude, the high flight Travel Move is four hours at this speed, with no need for driving/piloting checks (except in the case of bad weather, etc., at the referee's discretion).

Heavy Cargo Truck: Travel Move: 85/10; Configuration: Vehicle (Unarmored)

Ground Car: Travel Move: 260/50; Configuration: Vehicle (Unarmored)

Hovercraft: Travel Move: 240/195; Configuration: Vehicle (no turret)

Tracked ATU: Travel Move: 150/65; Configuration: Vehicle (no turret)

Range Truck: Travel Move: 240/85; Configuration: Vehicle (Unarmored)

Wheeled ATU: Travel Move: 175/65; Configuration: Vehicle (no turret)

Air Raft: Travel Move: 1440/260; Combat Move: 50/6; Configuration: Vehicle (Unarmored)

G-Carrier: Travel Move: 2880/260; Combat Move: 100/6; Configuration: Vehicle (Small Turret)

Enclosed Air Raft: Travel Move: 2880/260; Combat Move: 100/6; Configuration: Vehicle (no turret)

Grav Tank: Travel Move: 2400/345; Combat Move: 83/8; Configuration: Vehicle (Turret)

Speeder: Travel Move: 3360/390; Combat Move: 117/9; Configuration: Vehicle (no turret)

Grav Bike: Travel Move: 720/85; Combat Move: 25/2; Configuration: Use "Firing at Riders" (page 277) and "Motorcycles" (page 301)

Page 363 - G-Carrier - 20 Mj plasma crade gun Damage should be 16, and Penetration Values should be 16-8-1.

Page 364 - Grav Tank - 120 Mj fusion cradle gun Range should be 600\*.

This information was provided by Loren K. Wiseman in the Scorpia Bulletin Board Library section of the General Electric Network for Information Exchange.

## 4mm Combat Gauss Pistol

The combat gauss pistol is a more robust, lower recoil version of the standard gauss pistol.

**Ammo:** 4mm Gs  
**Wt:** 1.02 Kg  
**Mag:** 15 Box  
**Price:** 1,300 Cr  
**TL:** 13

Weapon	ROF	Dam	Pen	-Recoil-			
				Blk	SS	Brst	Rng
4mm Combat Gauss Pistol	3	1	1-Nil	1	3	5	30

## 12mm Auto Pistol

This auto pistol delivers a large round with little recoil. An optional flash suppressor costs Cr 14. The weapon cannot be holstered with it attached.

**Ammo:** 12 x 40mm CAP  
**Wt:** 4.0 Kg  
**Mag:** 10 Box  
**Price:** 1070Cr (Includes Laser Sight)  
**TL:** 10(A)

Weapon	ROF	Dam	Pen	-Recoil-			
				Blk	SS	Brst	Rng
12mm Auto Pistol	SA 4	2-3	Nil	2(3)	2	-	18

## ASSAULT SHOTGUN

The Aurora AS-1 is used by Terran Marines in boarding actions. Though heavy, it is extremely effective with a high powered round and low recoil. It is durable and easy to maintain.

**Ammo:** 18 x 100 mm Shotgun  
**Wt:** 8.54 Kgs  
**Mag:** 15 Box  
**Price:** 1,731 Cr  
**TL:** 12(C)

Weapon	ROF	Dam	Pen	-Recoil-			
				Blk	SS	Brst	Rng
AS Slug	5	5	3-4-Nil	4(5)	1	3	40
Shot(Cl)	5	10	1-Nil				
(Med) 5x10	2	1-Nil					

## 10mm Submachinegun

This SMG fires a large round with little recoil.

**Ammo:** 10 x 50 mm SMG  
**Wt:** 4.1 Kgs  
**Mag:** 30 Box  
**Price:** 748 Cr  
**TL:** 8

Weapon	ROF	Dam	Pen	-Recoil-			
				Blk	SS	Brst	Rng
10mm SMG	5	3	2-Nil	3	1	2	25

Becomes Bulk 5 when folding stock is extended.  
 Has laser sight and pistol grip.

## LARGE SCALE PLANETARY ASSAULTS

By Richard T. Artis

Of all the planetary defense weapons available, the most formidable are the deep meson gun sites. After fighting through the mobile defense forces (ships, system defense boats, and fighters), and reaching the planet, the next obstacle is the ground based defenses.

At lower tech levels, 7 to 11, ground based laser, energy, and missile batteries pose a threat, but against higher tech level vessels, they are more a nuisance than a threat. Direct fire weapons, lasers and energy weapons, can only fire at targets which are visible. Targets over the horizon are safe. Missiles can reach out further and can fire on targets which direct fire weapons cannot reach. However, if the fleet is sufficiently equipped with nuclear dampers, the missile threat is nullified.

Meson guns are more versatile. It can fire at any target, in any direction, and only meson screens are a defense against it. Of course, planetary meson guns are sufficiently large so that most meson screens are not that effective. Furthermore, located deep within a planet's crust, they cannot be detected and are vulnerable only to other meson guns which would have trouble hitting them. The weakness of the meson gun is its dependence upon sensor data, and those sensors are more vulnerable than the weapon itself.

Most planets will have orbital sensors, surface sensors, and a communication network linking the two with the defensive weapons. Therefore, the first step in an assault would be to destroy the orbital sensors.

For this, fleets would tend to use a long range strike with missiles followed closely by a fighter assault. The EMP from the missiles should blind or confuse the sensors that were not immediately destroyed by the missile strike. As they recover from that strike, the fighters could move in and destroy any remaining orbital sensors, and strike at surface sensors in a specific target area. The object is to create a sensor blind spot around the small area at which the fleet intends to form its beachhead.

In the game, *INVASION EARTH*, and published material, GDW discussed the invasion of Terra by the Imperium at the conclusion of the First Solomani Rim War. In that invasion, the Imperium first invaded Australia. True, it is a small out of the way continent, but it was good enough to establish a foothold on the planet.

Preparatory to any assault, a fleet must recon the planet. Sensors in orbit are readily detectable, and sensor sites on the surface can be located through photo recon, electronic intelligence, or agents on the surface. This should locate most of the sites, but some secret sites may still exist.

However, striking a small area would increase the fleets chances of completely blinding the planetary defenses in that area. If the deep meson gunners cannot lock on the attacking fleet, it cannot fire upon the attacking fleet. Opening a corridor for attack is a tactic similar to the use of a Wild Weasel aircraft to open a corridor for an air strike.

Once a hole is established, the assault can begin. A fleet might initially employ jump troops to get to the surface quickly and set up a landing zone. Then the assault shuttles and other landers could descend with heavier equipment and troops. Jump troops might also be used for lightening quick commando raids against important targets.

# HIWG

## History of the Imperium Working Group *More than the name implies!*

### THE EVOLUTION OF HIWG

The History of the Imperium Working Group (HIWG) is an international organization of Traveller fans. Founded in 1987, it now has members from Finland to Japan and many points in between.

HIWG originally planned to expand on Imperial history starting with the assassination of Strepion then going through the rebellion and beyond. As HIWG set out toward that goal, it quickly expanded beyond that purpose. Many joining HIWG were interested in aspects of Traveller other than history. Thus were created a number of Special Interest Groups and HIWG became more than an organization creating history. It became an idea exchange.

Several members got started as Traveller writers by creating documents for HIWG. Both Digest Group and GDW, although under no obligation to do so, have used material developed by HIWG.

### HIWG IN THE NEW ERA

But that was then, and this is now. The Imperial timeline has gone well past the rebellion. So what is HIWG's role now? HIWG remains what it has become, an organization of Traveller players and referees.

However, HIWG still does development. All the people credited for the creation of HubWorlds in Traveller: The New Era are HIWG members. HIWG will continue to develop the HubWorlds and expects material to appear in Imperial

Lines and Challenge.

But our development is not limited to the HubWorlds. Some members are applying the effects of the Collapse to published sectors, others are concentrating on the Regency, and others are working with the Reformation Coalition.

There will be members creating equipment, vehicles, and starships. If there is a Traveller related activity you are interested in which is not mentioned here, it has a place in HIWG too.

### HOW YOU CAN JOIN

Membership is available at \$2.00 (U.S Funds) per issue of AAB Proceedings, which is usually purchased in 6 issue increments (\$12.00). Persons living in the United States or Canada can send the fee to the Membership Secretary.

Persons living overseas should contact the HIWG Connection nearest them.

See the sidebar for names and addresses.

Prices for overseas memberships may vary slightly. Contact your HIWG Connection for details.

### WHAT MEMBERSHIP GETS YOU

Membership gets you copies of AAB Proceedings (HIWG's Official Newsletter), a membership directory, and a list of HIWG documents. More importantly, your membership makes you a part of a world wide association of others who share your interest in Traveller.

Ammerrudgranda 168  
0960 Oslo, Norway.

He produces Kfan Uzangou, a newsletter focusing on the Uargr and Guurrdon sector.

# EVENT HORIZON CURRENT AND FUTURE RELEASES

Event horizon describes current and projected releases of products related to GDW's futuristic role playing games. Remember that all dates are projected release dates and are subject to change.

## FROM THE WORKSHOP

Currently available are: SURVIVAL MARGIN: GATEWAY TO THE NEW ERA; TRAVELLER: THE NEW ERA; and BRILLIANT LANCES. For more information about these products, see QUICK REVIEWS on Page 2.

**OCTOBER - TNE PLAYERS HANDBOOK** - will contain more background information, ready to play player character templates, and other character related things.

**NOVEMBER - FIRE, FUSION, AND STEEL** - the technical design book for TNE. This book will have the starship design rules presented in BRILLIANT LANCES, rules for vehicle, weapon, and equipment design, and notes on designing the technology base for your own universe. Also in November - DELUXE TNE. This will contain the basic rule book, FIRE, FUSION, AND STEEL, and some other goodies which will be available separately for those who have already purchased the basic book.

**DECEMBER - SMASH 'N' GRAB** - this will be the first TNE sourcebook detailing one type of Star Viking operation, and containing several independent scenarios of that type.

**JANUARY - TNE REF'S SCREEN**

**FEBRUARY AND BEYOND - MANY MORE TNE ITEMS.**

**FROM RAFM** - Traveller starship miniatures will be sent to distributors early in October. Some of you have seen samples at GENCON. Reports are they are very good looking. Watch for them in your favorite game store.

## FROM DIGEST GROUP PUBLICATIONS

MEGATRAVELLER JOURNAL 4 may still be available in some stores or directly from DGP. MTJ 4 is primarily an adventure by the Kieth brothers set in Gateway Sector. Titled "Lords of Thunder", the adventure takes place away from the rebellion, but is no less dangerous. MTJ 4 is Digest Group's last Traveller product.

## FROM SEEKER

SEEKER now has a large set of deck plans which includes several ships and a good number of small vessels. It retails for \$19.95 which is less than trying to buy all these separately. For a free catalog write to Seeker Gaming Systems, P.O. Box 1027, Spanaway, WA 98373.

## FROM PARAGON SOFTWARE

PARAGON has announced the release of MEGATRAVELLER III this fall.

**HIWG**  
The History of the Imperium Working Group is still going strong. Yearly membership is \$12.00. Members receive the club publication AAB Proceedings. For more information See the flier on page 8.
